Cloud Infrastructure Review 2017 Computing:

Advanced Computing Techniques for Optimization in Cloud H S Madhusudhan, Punit Gupta, Pradeep Singh Rawat, 2024-09-11 This book focuses on the current trends in research and analysis of virtual machine placement in a cloud data center. It discusses the integration of machine learning models and metaheuristic approaches for placement techniques. Taking into consideration the challenges of energy efficient resource management in cloud data centers, it emphasizes upon computing resources being suitably utilised to serve application workloads in order to reduce energy utilisation while maintaining apt performance. This book provides information on fault tolerant mechanisms in the cloud and provides an outlook on task scheduling techniques. Focuses on virtual machine placement and migration techniques for cloud data centers. Presents the role of machine learning and metaheuristic approaches for optimisation in cloud computing services. Includes application of placement techniques for quality of service performance and reliability improvement. Explores data center resource management, load balancing and orchestration using machine learning techniques. Analyses dynamic and scalable resource scheduling with a focus on resource management. The text is for postgraduate students, professionals and academic researchers working in the fields of computer science and information technology. *Sensors, Cloud, and Fog*

Sudip Misra, Subhadeep Sarkar, Subarna Chatterjee, 2019-06-20 This book provides an in depth understanding of Internet of Things (IoT) technology. It highlights several of today's research and technological challenges of translating the concept of the IoT into a practical, technologically feasible and business viable solution. It introduces two novel technologies: sensor cloud and fog computing as the crucial enablers for the sensing and compute backbone of the IoT. The book discusses these two key enabling technologies of IoT that include a wide range of practical design issues and the futuristic possibilities and directions involving sensor networks and cloud and fog computing environments towards the realization and support of IoT. Classroom presentations and solutions to end of chapter questions are available to instructors who use the book in their classes.
