George Cathcart, 2001 Text is appropriate for courses in Mathematics for the Elementary School Built on the foundation of the new 2000 NCTM Principles and Standards this major new entry for K-8 math methods has impacted the market because of its point of use links to the standards and its emphasis on the importance of a child-centered approach creating a learning environment that informs teachers how to support children as they build understandings of math concepts Designed to be neither skimpy nor exhaustive this text presents theory in an accessible manner and models a wealth of practical activities for teaching Five videos from the Annenberg CPB TEACHING MATH video series bring real classrooms to life for teachers and are integrated into the text as four color resourceful inserts Math Matters Suzanne H. Chapin, Art Johnson, 2006 Shows teachers the why behind the procedures they teach in elementary math **The Arithmetic Teacher**, 1993 **A Resource Guide for Elementary School Teaching** Richard Dean Kellough, Patricia Roberts, 1994 A Resource Guide for Elementary School Teaching is a practical comprehensive and concise methods book designed to engage readers in hands-on and minds-on learning about effective teaching A four-part organization covers an orientation to elementary school teaching and learning planning for instruction strategies aids media and resources for effective instruction assessment and professional development A new chapter on elementary school children discusses their development and their diversity and specific strategies for working with them Engaging Young Children in Mathematics Douglas H. Clements, Julie Sarama, 2004 Engaging Young Children in Mathematics Standards for Early Childhood Mathematics Education brings together the combined wisdom of a diverse group of experts involved with early childhood mathematics The book originates from the landmark 2000 Conference on Standards for Pre-kindergarten and Kindergarten Mathematics Education attended by representatives from almost every state developing standards for young children's mathematics federal government officials mathematicians mathematics educators researchers from mathematics education early childhood education and psychology curriculum developers teachers policymakers and professionals from organizations such as the National Conference of Teachers of Mathematics and the National Association for the Education of Young Children The main goal of the Conference was to work collectively to help those responsible for framing and implementing early childhood mathematics standards Although it has its roots in the Conference the expanded scope of the standards and recommendations covered in this book includes the full range of kindergarten to grade 2 The volume is organized into two main parts and an online appendix [http](http://)

www.gse.buffalo.edu/org/conference/Part_One_Major_Themes_and_Recommendations offers a framework for thinking about pre-kindergarten through grade 2 mathematics education and specific recommendations. Part Two, *Elaboration of Major Themes and Recommendations*, provides substantive detail regarding young students' understandings of mathematical ideas. Each Part includes five parallel subsections: Standards in Early Childhood Education, Math Standards and Guidelines, Curriculum Learning, Teaching and Assessment, Professional Development, and Toward the Future Implementation and Policy. As a whole, the book presents comprehensive summaries of research that provide specific guidelines for standards, curriculum, and teaching. It takes the recent reports and recommendations for early childhood mathematics education to the next level, integrates practical details and research throughout, and provides a succinct but thorough review of research on the topics, sequences, and learning trajectories that children can and should learn at each of their first years of life, with specific developmental guidelines that suggest appropriate content for each topic for each year from 2-year-olds to 7-year-olds. This is an indispensable volume for mathematics educators, researchers, curriculum developers, teachers, and policymakers, including those who create standards, scope and sequences, and curricula for young children and professional teacher development materials and students in mathematics education, early childhood trainers, teacher educators, and faculty in mathematics education.
