Advances in Design Automation, 1989: Computer-aided and computational Design Bahram Ravani,1989

Nonequilibrium Thermodynamics Yasar Demirel,2007-10-10 Natural phenomena consist of simultaneously occurring transport processes and chemical reactions These processes may interact with each other and lead to instabilities fluctuations and evolutionary systems This book explores the unifying role of thermodynamics in natural phenomena Nonequilibrium Thermodynamics Second Edition analyzes the transport processes of energy mass and momentum transfer processes as well as chemical reactions It considers various processes occurring simultaneously and provides students with more realistic analysis and modeling by accounting possible interactions between them This second edition updates and expands on the first edition by focusing on the balance equations of mass momentum energy and entropy together with the Gibbs equation for coupled processes of physical chemical and biological systems Every chapter contains examples and practical problems to be solved This book will be effective in senior and graduate education in chemical mechanical systems biomedical tissue biological and biological systems engineering as well as physical biophysical biological chemical and biochemical sciences Will help readers in understanding and modelling some of the coupled and complex systems such as coupled transport and chemical reaction cycles in biological systems Presents a unified approach for interacting processes combines analysis of transport and rate processes Introduces the theory of nonequilibrium thermodynamics and its use in simultaneously occurring transport processes and chemical reactions of physical chemical and biological systems A useful text for students taking advanced thermodynamics courses

Sustainable Manufacturing Günther Seliger,2012-06-30

The annual series Global Conferences on Sustainable Manufacturing GCSM sponsored by the International Academy for Production Engineering CIRP is committed to excellence in the creation of sustainable products and processes that conserve energy and natural resources have minimal negative impacts upon the natural environment and society and adhere to the core principle of sustainability by considering the needs of the present without compromising the ability of future generations to meet their own needs To promote this noble goal there is a great need for increased awareness in education and training including the dissemination of new findings on principles and practices of sustainability applied to manufacturing The series Global Conferences on Sustainable Manufacturing offers international colleagues the opportunity to network expand their knowledge and improve practice globally
