**Plato's Dialectic at Play** Kevin Corrigan,Elena Glazov-Corrigan,2004-11-15 The Symposium is one of Plato s most accessible dialogues an engrossing historical document as well as an entertaining literary masterpiece By uncovering the structural design of the dialogue Plato s Dialectic at Play aims at revealing a Plato for whom the dialogical form was not merely ornamentation or philosophical methodology but the essence of philosophical exploration His dialectic is not only argument it is also play Careful analysis of each layer of the text leads cumulatively to a picture of the dialogue s underlying structure related to both argument and myth and shows that a dynamic link exists between Diotima s higher mysteries and the organization of the dialogue as a whole On this basis the authors argue that the Symposium with its positive theory of art contained in the ascent to the Beautiful may be viewed as a companion piece to the Republic with its negative critique of the role of art in the context of the Good Following Nietzsche s suggestion and applying criteria developed by Mikhail Bakhtin they further argue for seeing the Symposium as the first novel The book concludes with a comprehensive reevaluation of the significance of the Symposium and its place in Plato s thought generally touching on major issues in Platonic scholarship the nature of art the body soul connection the problem of identity the relationship between mythos and logos Platonic love and the question of authorial writing and the vanishing signature of the absent Plato himself *Connecting the Individual and the Community in Sociolinguistic Panel Research* Isabelle Buchstaller,Karen V. Beaman,2025-10-31 This collection engages with key questions in panel study research by exploring more deeply the interrelationship between the individual and the community and the impact on language change across the lifespan The book is organized around four broad themes each followed by a forward looking commentary that ties together the key findings from the individual chapters The first section examines style and socio indexicality with the goal of disentangling short term style shifting from long term language change The second section continues with a focus on style examining audience design and socially meaningful variation in professional settings as an integral component of age and role appropriate behavior The third section considers different language dialect contact scenarios and the impact on changing social identities and behavioural norms which can fluctuate across the lifespan for different settings and life stages and for different types of variables The final section explores a computational agent based model of lifespan and community change targeting the practical challenges often encountered in panel research such as data sparsity and the short duration of the human lifespan A postscript underscores the importance of considering style and setting as integral aspects of panel research rather than as afterthoughts and of leveraging

computational modeling to expand our understanding of the interdependencies between lifespan and community change This book will appeal to scholars interested in language variation and change sociolinguistics historical linguistics and computational linguistics

Lost Worlds Jonathan Dewald,2006-09-28 Today s interest in social history and private life is often seen as a twentieth century innovation Most often Lucien Febvre and the Annales school in France are credited with making social history a widely accepted way for historians to approach the past In Lost Worlds historian Jonathan Dewald shows that we need to look back further in time into the nineteenth century when numerous French intellectuals developed many of the key concepts that historians employ today According to Dewald we need to view Febvre and other Annales historians as participants in an ongoing cultural debate over the shape and meanings of French history rather than as inventors of new topics of study He closely examines the work of Charles Augustin Sainte Beuve Hippolyte Taine the antiquarian Alfred Franklin Febvre himself the twentieth century historian Philippe Ari s and several others A final chapter compares specifically French approaches to social history with those of German historians between 1930 and 1970 Through such close readings Dewald looks beyond programmatic statements of historians intentions to reveal how history was actually practiced during these years A bold work of intellectual history Lost Worlds sheds much needed light on how contemporary ideas about the historian s task came into being Understanding this larger context enables us to appreciate the ideological functions performed by historical writing through the twentieth century
