

$$\nabla^b \nabla^a F_{ab} = -4\pi \nabla^b j_b$$

$$\frac{-1}{4\pi} \nabla^b \nabla^a F_{ab} = \nabla^b j_b = \nabla_b j^b$$

$$\left. \begin{aligned} \nabla^b j_b &= g^{ab} \nabla_a j_b \\ &= \nabla_a (g^{ab} j_b) \\ &= \nabla_a j^a \end{aligned} \right\}$$

Show that $\nabla^b \nabla^a F_{ab} = 0$

$$\nabla^b \nabla^a F_{ab} + \nabla^a \nabla^b F_{ba} = -4\pi (\nabla^b j_b + \nabla^a j_a)$$

$$= -8\pi \nabla^b j_b$$

Solution Wald Problems General Relativity:

General Relativity Robert M. Wald, 1984-06-15 Wald's book is clearly the first textbook on general relativity with a totally modern point of view and it succeeds very well where others are only partially successful. The book includes full discussions of many problems of current interest which are not treated in any extant book and all these matters are considered with perception and understanding. S Chandrasekhar A tour de force lucid straightforward mathematically rigorous exacting in the analysis of the theory in its physical aspect L P Hughston Times Higher Education Supplement Truly excellent A sophisticated text of manageable size that will probably be read by every student of relativity astrophysics and field theory for years to come James W York Physics Today

Selected Topics In Quantum Field Theory And Mathematical Physics J Fischer, J Niederle, 1990-05-01

Physics Of Reality, The: Space, Time, Matter, Cosmos - Proceedings Of The 8th Symposium Honoring Mathematical Physicist Jean-pierre Vigiér Richard L Amoroso, Louis H Kauffman, Peter Rowlands, 2013-09-18 A truly Galilean class volume this book introduces a new method in theory formation completing the tools of epistemology. It covers a broad spectrum of theoretical and mathematical physics by researchers from over 20 nations from four continents. Like Vigiér himself the Vigiér symposia are noted for addressing avant garde cutting edge topics in contemporary physics. Among the six proceedings honoring J P Vigiér this is perhaps the most exciting one as several important breakthroughs are introduced for the first time. The most interesting breakthrough in view of the recent NIST experimental violations of QED is a continuation of the pioneering work by Vigiér on tight bound states in hydrogen. The new experimental protocol described not only promises empirical proof of large scale extra dimensions in conjunction with avenues for testing string theory but also implies the birth of the field of unified field mechanics ushering in a new age of discovery. Work on quantum computing redefines the qubit in a manner that the uncertainty principle may be routinely violated. Other breakthroughs occur in the utility of quaternion algebra in extending our understanding of the nature of the fermionic singularity or point particle. There are several other discoveries of equal magnitude making this volume a must have acquisition for the library of any serious forward looking researchers. *Recent Developments in General Relativity, Genoa 2000* R. Cianci, R. Collina, M. Francaviglia, P. Fre, 2002-07 A survey of the most recent developments in general relativity and in the theory of the unification of Fundamental Interactions is presented in this book. The theoretical results the cosmological and astrophysical aspects the experimental and observational programs are shown in 26 general talks by renowned scientists active in this field.

New Approaches to Scientific Realism Wenceslao J. Gonzalez, 2020-08-24 Scientific realism is at the core of the contemporary philosophical debate on science. This book analyzes new versions of scientific realism. It makes explicit the advantages of scientific realism over alternatives and antagonists contributes to deciding which of the new approaches better meets the descriptive and the prescriptive criteria and expands the philosophico methodological field to take in new topics and disciplines. Relativity Alan D. Rendall, 2008-04-03 A text that will bring together PDE theory general relativity and astrophysics to deliver an overview of theory of partial differential equations for general relativity The text will include numerous examples and provide a unique resource for graduate students in mathematics and physics numerical relativity and cosmology

Accelerating Expansion Gordon Belot, 2023-07-25 Accelerating Expansion explores some of the philosophical implications of modern cosmology focused on the significance that the discovery of the accelerating expansion of the Universe has for our understanding of time geometry and physics The appearance of the cosmological constant in the equations of general relativity allows one to model universes in which space has an inherent tendency towards expansion This constant introduced by Einstein but subsequently abandoned by him returned to centre stage with the discovery of the accelerating expansion This pedagogically oriented essay begins with a study of the most basic and elegant relativistic world that involves a positive cosmological constant de Sitter spacetime It then turns to the relatives of de Sitter spacetime that dominate modern relativistic cosmology Some of the topics considered include the nature of time and simultaneity in de Sitter worlds the sense in which de Sitter spacetime is a powerful dynamical attractor the limited extent to which observation can give us information about the topology of space in a world undergoing accelerated expansion and cosmologists favourite sceptical worry about the reliability of evidence and the possibility of knowledge the problem of Boltzmann brains **PSA**
