This paper investigates the empirical studies examining the relationship between Accounting Information Systems (AIS) alignment and performance in Small and Medium Enterprises (SMEs). Hussin *et al.*, (2002) found that there is a relationship among owner commitment, information technology (IT) sophistication, external IT expertise, and information systems (IS) alignment, while Ismail and King (2006) found that information systems alignment has a significant impact on firm performance. This paper discusses previous researches that explain SMEs performance and the factors influencing performance of SMEs.

Previous studies have attempted to explain the relationship between AIS and SMEs performance (Boulianne, 2007; Francalanci and Morabito,

2008). Hussin *et al.*, (2002) and, Ismail and King (2007) explain determinant of information systems implementation such as IT sophistication, owner commitment, and IT strategy on AIS alignment in SMEs. The studies on technological implementation in SMEs are more interesting than those in large firms. Although research on IT and performance has been conducted in large firms, it is important for small firms, since the implementation of technology will improve small firm performance (Grande *et al.*, 2010). Both small firms and large firms have implemented AIS (Ismail and King, 2006). However, the development of IT in large firms cannot be equally applied to small firms (Thong, 1999).

The writer included a list of previous researches investigating AIS and performance in the Appendix-I of this paper. Some researchers have attempted to associate AIS with

Index to Theses with Abstracts Accepted for Higher Degrees by the Universities of Great Britain and Ireland and the Council for National Academic Awards, 2007 **Information and Communication Technology and Small and Medium Sized Enterprises** Diane Poulin, Sébastien Tran, 2010 The arrival of Information and Communication Technology may play a role in restoring competitiveness since these technologies are also a factor in relaxing the constraints specific to SMEs. ICT makes a number of services possible in a large range of processes and transactions within and between companies. Internally, ICT applications can improve knowledge and information management practices; they can also allow more rapid and more reliable transactions between businesses B2B and between businesses and consumers B2C. They are equally quite effective in improving external business communications and service quality for both new and existing clients. They also appear to be a source of competitive advantage for SMEs under certain conditions. Few studies have focused on the ways that SMEs can use ICT to improve and defend their competitive positions. This book provides a synthesis of the advantages of ICT for SMEs. Seven chapters illustrate the technologies used in such companies. Each of these chapters provides a theoretical and/or practical view of the way that SMEs can use ICT. This book is an indispensable reference for both academics and for practitioners. *Kinh tế và dự báo*, 2021 **Peterson's Graduate Programs in Business, Education, Health, Information Studies, Law and Social Work** Peterson's Guides Staff, Peterson's Guides, Inc, 2006-12 Detailed program listings of accredited graduate programs in the physical sciences, math and agricultural sciences. *Graduate Programs in Business, Education, Health, Information Studies, Law and Social Work* Peterson's Guides Staff, Peterson's, 2007-12 The six volumes of Peterson's Annual Guides to Graduate Study, the only annually updated reference work of its kind, provide wide ranging information on the graduate and professional programs offered by accredited colleges and universities in the United States and U.S. territories and those in Canada, Mexico, Europe and Africa that are accredited by U.S. accrediting bodies.
