

**ACTIVITY-BASED COSTING**

**PROBLEM 1**

Duckhorn Housecleaning provides housecleaning services to its clients. The company uses an activity-based costing system for its overhead costs. The company has provided the following data from its activity-based costing system.

<i>Activity Cost Pool</i>	<i>Total Cost</i>	<i>Total Activity</i>
Cleaning.....	\$645,576	72,700 hours
Job support .....	\$129,546	5,400 jobs
Client support .....	\$ 20,900	760 clients
Other .....	<u>\$110,000</u>	Not applicable
Total.....	<u>\$906,022</u>	

The "Other" activity cost pool consists of the costs of idle capacity and organization-sustaining costs.

One particular client, the Lumbar family, requested 31 jobs during the year that required a total of 62 hours of housecleaning. For this service, the client was charged \$1,620

Required:

- Compute the activity rates (i.e., cost per unit of activity) for the activity cost pools. Round off all calculations to the nearest whole cent.
- Using the activity-based costing system, compute the customer margin for the Lumbar family. Round off all calculations to the nearest whole cent.
- Assume the company decides instead to use a traditional costing system in which ALL costs are allocated to customers on the basis of cleaning hours. Compute the margin for the Lumbar family. Round off all calculations to the nearest whole cent.

**PROBLEM 2**

TriCo would like to institute an activity-based costing system to price products. The company's Purchasing Department incurs costs of \$550,000 per year and has six employees. Purchasing has determined the three major activities that occur during the year.

<i>Activity</i>	<i>Allocation Measure</i>	<i># of People</i>	<i>Total Cost</i>
Issuing purchase orders	# of purchase orders	1	\$150,000
Reviewing receiving reports	# of receiving reports	2	\$175,000
Making phone calls	# of phone calls	3	\$225,000

During the year 50,000 phone calls were made in the department; 15,000 purchase orders
