Why Trade

Contractors Fail and How to Prevent It Jim McCain,2011-06 The Book Thousands of Trade Contractors Will Want by Their Sides Trade contractors excel at mastery of their specific crafts The plumber the electrician the carpet installer the home builder all these and the many other contractors and subcontractors servicing America s homes and businesses know the technical aspects of their craft inside out But their knowledge of business systems often lags Too many of them fail when it comes to understanding how to manage cash use telemarketing techniques to get new business minimize their inventories and the dozens of other business techniques that spell the difference between success and failure The Business Doctor s book Why Trade Contractors Fail and How to Prevent It subtitled A Handbook of Financial Operations and Marketing Procedures to Help Trade Contractors Succeed addresses those issues It attacks specific problems that contractors face Most books addressing this market are too academic and excessively focused on theory This one is hands on practical the way blue collar contractors understand it and like it

Cost Optimal and Nearly Zero-Energy Buildings (nZEB) Jarek Kurnitski,2013-11-20 Cost optimal and nearly zero energy performance levels are principles initiated by the European Union s EU Energy Performance of Buildings Directive which was recast in 2010 These will be major drivers in the construction sector in the next few years because all new buildings in the EU from 2021 onwards are expected to be nearly zero energy buildings nZEB This book introduces the technical definitions system boundaries energy calculation methodology and input data needed to set primary energy based minimum cost optimal and nZEB requirements in national energy frames Worked examples are provided to illustrate the calculation of delivered exported and primary energy and renewable energy contribution Five case studies of high performance nZEB office buildings across Europe are reported to show alternative technical solutions and to draw some general design rules based on completed nZEB buildings Specific features of the nZEB design process especially in the early stages and architectural competitions are included These describe important design issues in the scoping and conceptual design phase allowing design streams to be controlled so that specified targets can be met This book is intended for readers who need to be aware of or are working with the energy performance of buildings for decision makers in public and private sectors architects engineers construction clients consultants contractors manufacturers and students The editor of this book Professor Jarek Kurnitski has made major contributions to the preparation of the European REHVA nZEB technical definition and has developed energy calculation frames for current Estonian and Finnish energy performance regulations He is the leader of nZEB research at Tallinn University of Technology in Estonia and Aalto University in Finland and he has over 300 publications
