Paul F. Aubin
Paul F. Aubin Consulting Services

AB2083-L The power and potential of the Autodesk Revit Family Editor is vast, and 90 minutes just doesn't do it justice. Dispensing with the basics, this hands-on lab jumps right into the deep end of the pool (if you need to brush up on the basics, video recordings of many Family Editor basics are posted on my website for all attendees). In this lab, we will explore advanced parameters and the use of formulas to drive the geometry. Whether you are new to the Family Editor or just want to use its more advanced features, this lab will give you the tools to begin making more advanced family content. We will explore formulas, family type parameters, materials, and even dabble in some trigonometric functions. So be sure to buckle your seat belt. You are in for an exciting ride!

Learning Objectives

At the end of this class, you will be able to:

- Create advanced family templates such as face-based
- Use formulas to drive parametric values
- Use mathematical relationships instead of geometry to control behavior
- Control nested families with family type parameters
