Marco Wiering, Martijn van Otterlo

Pro Blog Post Ideas Full Tutorial For Beginners:

Designing for Learning in an Open World Gráinne Conole,2012-09-21 The Internet and associated technologies have been around for almost twenty years Networked access and computer ownership are now the norm There is a plethora of technologies that can be used to support learning offering different ways in which learners can communicate with each other and their tutors and providing them with access to interactive multimedia content However these generic skills don't necessarily translate seamlessly to an academic learning context Appropriation of these technologies for academic purposes requires specific skills which means that the way in which we design and support learning opportunities needs to provide appropriate support to harness the potential of technologies More than ever before learners need supportive learning pathways to enable them to blend formal educational offerings with free resources and services This requires a rethinking of the design process to enable teachers to take account of a blended learning context

Reinforcement Learning Marco Wiering,Martijn van Otterlo,2012-03-05 Reinforcement learning encompasses both a science of adaptive behavior of rational beings in uncertain environments and a computational methodology for finding optimal behaviors for challenging problems in control optimization and adaptive behavior of intelligent agents As a field reinforcement learning has progressed tremendously in the past decade The main goal of this book is to present an up to date series of survey articles on the main contemporary sub fields of reinforcement learning This includes surveys on partially observable environments hierarchical task decompositions relational knowledge representation and predictive state representations Furthermore topics such as transfer evolutionary methods and continuous spaces in reinforcement learning are surveyed In addition several chapters review reinforcement learning methods in robotics in games and in computational neuroscience In total seventeen different subfields are presented by mostly young experts in those areas and together they truly represent a state of the art of current reinforcement learning research Marco Wiering works at the artificial intelligence department of the University of Groningen in the Netherlands He has published extensively on various reinforcement learning topics Martijn van Otterlo works in the cognitive artificial intelligence group at the Radboud University Nijmegen in The Netherlands He has mainly focused on expressive knowledge representation in reinforcement learning settings
