McKendrick, 2022-11-30 This book examines the intersections between children education and geography With a particular focus on children s geographies and geographies of education the book draws upon cutting edge research to consider how geographical education can be enhanced through increased engagement with these fields The book is underpinned by the position that the lives of children and young people are inherently geographical as are educational institutions systems and processes The volume explores the ways in which the diverse relationships between children education and geography can enrich research and work with and for children and young people Chapters in this book

consider how injustices are reproduced through education. Chapters also explore how insights generated by thinking in and across geography and education can be used to support and empower young people in both formal education and in their everyday lives. Ultimately, this book is written for children and young people, not as the readership but as people often marginalised in decision making at a variety of scales in education and who we contend should be at the heart of all educational thinking. The book is of value to undergraduate and postgraduate students interested in geography education and children's geographies, as well as teachers of geography, both new and experienced.
