Time Series Data Analysis Using Eviews:

Time Series Data Analysis Using Eviews Lavra Filipek, 2015-08 EViews Econometric Views is a statistical package for Windows used mainly for time series oriented econometric analysis Basic time series modelling in EViews including using lags taking differences introducing seasonality and trends as well as testing for serial correlation estimating ARIMA models and using heteroskedastic and autocorrelated consistent standard errors EViews can be applied for general statistical analysis and econometric analyses such as cross section and panel data analysis and time series estimation and forecasting EViews combines spreadsheet and relational database technology with the traditional tasks found in statistical software and uses a Windows GUI This book provides a hands on practical guide to using the most suitable models for analysis of statistical data sets using EViews an interactive Windows based computer software program for sophisticated data analysis regression and forecasting to define and test statistical hypotheses Rich in examples and with an emphasis on how to develop acceptable statistical models Time Series Data Analysis Using EViews presents statistical or econometric models for time series data This book is designed as a reference tool to time series analysis in a very powerful and popular econometric software EViews It will also address the modules and structures of EViews that will help readers to fully harness the capabilities of the software

Time Series Data Analysis Using EViews I. Gusti Ngurah Agung, 2011-08-31 Do you want to recognize the most suitable models for analysis of statistical data sets This book provides a hands on practical guide to using the most suitable models for analysis of statistical data sets using EViews an interactive Windows based computer software program for sophisticated data analysis regression and forecasting to define and test statistical hypotheses Rich in examples and with an emphasis on how to develop acceptable statistical models Time Series Data Analysis Using EViews is a perfect complement to theoretical books presenting statistical or econometric models for time series data The procedures introduced are easily extendible to cross section data sets The author Provides step by step directions on how to apply EViews software to time series data analysis Offers guidance on how to develop and evaluate alternative empirical models permitting the most appropriate to be selected without the need for computational formulae Examines a variety of times series models including continuous growth discontinuous growth seemingly causal regression ARCH and GARCH as well as a general form of nonlinear time series and nonparametric models Gives over 250 illustrative examples and notes based on the author's own empirical findings allowing the advantages and limitations of each model to be understood Describes the theory behind the models in comprehensive appendices Provides supplementary information and data sets An essential tool for advanced undergraduate and graduate students taking finance or econometrics courses Statistics life sciences and social science students as well as applied researchers will also find this book an invaluable resource *Advanced Time Series Data Analysis I.* Gusti Ngurah Agung, 2018-12-28 Introduces the latest developments in forecasting in advanced quantitative data analysis This book presents advanced univariate multiple regressions which can directly be used to forecast their dependent

variables evaluate their in sample forecast values and compute forecast values beyond the sample period Various alternative multiple regressions models are presented based on a single time series bivariate and triple time series which are developed by taking into account specific growth patterns of each dependent variables starting with the simplest model up to the most advanced model Graphs of the observed scores and the forecast evaluation of each of the models are offered to show the worst and the best forecast models among each set of the models of a specific independent variable Advanced Time Series Data Analysis Forecasting Using EViews provides readers with a number of modern advanced forecast models not featured in any other book They include various interaction models models with alternative trends including the models with heterogeneous trends and complete heterogeneous models for monthly time series quarterly time series and annually time series Each of the models can be applied by all quantitative researchers Presents models that are all classroom tested Contains real life data samples Contains over 350 equation specifications of various time series models Contains over 200 illustrative examples with special notes and comments Applicable for time series data of all quantitative studies Advanced Time Series Data Analysis Forecasting Using EViews will appeal to researchers and practitioners in forecasting models as well as those studying quantitative data analysis It is suitable for those wishing to obtain a better knowledge and understanding on forecasting specifically the uncertainty of forecast values
