Meleis,2011 An additional assumption was that the processes for theory development were new to nursing and hence nurses

in graduate programs learned strategies for advancing knowledge from other disciplines This assumption was debunked with

the knowledge that nurses were always engaged in knowledge development driven by their experiences in clinical practice

Because of these assumptions most of the early writing about theory development was about outlining strategies that should

be used rather than strategies that have already been used in the discipline to develop theories Theorists themselves did not

uncover or adequately discuss ways by which they developed their theories therefore the tendency was to describe processes

that were based on theories developed in other disciplines mainly the physical and social sciences And an implicit assumption

was made that there should be a single strategy for theory development some claiming to begin the process from practice

and others believing it should be driven by research Provided by publisher **Chinese Heritage Sites and their**

heritage sites they are doing cultural social and emotional work whilst also negotiating cultural meanings Providing an

examination of the complex interactions between locals and tourists the author then considers how tourists navigate and

interpret heritage sites Finally Zhang examines whether the government or locally controlled tourism enterprises are more

effective in facilitating meaningful cultural interaction between tourists and locals Overall the book demonstrates the

interrelation between tourism and heritage and the tensions that are created when the ways in which sites are used differ

from the expectations of UNESCO and national or regional site managers Chinese Heritage Sites and their Audiences pays particular attention to ongoing debates about heritage performances the importance of emotions and the agency of tourists and will thus appeal to academics and students engaged in the study of heritage tourism landscape architecture and anthropology
