present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places The authors in Part Three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places These selections are largely describing the outcomes of mid century urban design and voicing concerns over the placeless quality of contemporary urbanism The fourth part of the Reader explores key issues in urban design and development Ideas about sprawl density community health public space and everyday life are the primary focus here Several new selections in this part of the book also highlight important international development trends in the Middle East and China Part Five presents environmental challenges faced by the built environment professions today including recent material on landscape urbanism sustainability and urban resiliency The final part examines professional practice and current debates in the field where urban designers work what they do their roles their fields of knowledge and their educational development The section concludes with several position pieces and debates on the future of urban design practice This book provides an essential resource for students and practitioners of urban design drawing together important but widely dispersed writings Part and section introductions are provided to assist readers in understanding the context of the material summary messages impacts of the writing and how they fit into the larger picture of the urban design field

The City at Eye Level

Meredith Glaser,2012 Although rarely explored in academic literature most inhabitants and visitors interact with an urban landscape on a day to day basis is on the street level Storefronts first floor apartments and sidewalks are the most immediate and common experience of a city These plinths are the ground floors that negotiate between inside and outside the public and private spheres *The City at Eye Level* qualitatively evaluates plinths by exploring specific examples from all over the world Over twenty five experts investigate the design land use and road and foot traffic in rigorously researched essays case studies and interviews These pieces are supplemented by over two hundred beautiful color images and engage not only with issues in design but also the concerns of urban communities The editors have put together a comprehensive guide for anyone concerned with improving or building plinths including planners building owners property and shop managers designers and architects

Cut and Paste Urban Landscape Mira Engler,2015-08-11 During the post war era the emerging consumer economy radically changed both the discourse and practice of architecture It was a time where architecture became a mainstream commodity whose products sold through mass media a time in which Thomas Gordon Cullen came to be one of Britain s best known twentieth century architectural draftsmen Despite Cullen s wide acclaim there has been little research into his life and work particularly his printed images and his methods of operation This book examines Cullen s drawings and book design and also looks into his process of image making to help explain his considerable popularity and influence which continues to this day It presents the lessons Cullen had to offer in today s design culture and practice and looks into the post war consumerist design strategies that are still used today
