# Application Notes for Configuring SFR SIP Trunking with Avaya IP Office Release 11.0 using UDP/RTP - Issue 1.0

### Abstract

These Application Notes describe the procedures for configuring Session Initiation Protocol (SIP) Trunking between service provider SFR and Avaya IP Office Release 11.0.

SFR SIP Trunking Service provides PSTN access via a SIP trunk between the enterprise and the SFR network as an alternative to legacy analog or digital trunks. This approach generally results in lower cost for the enterprise.

Readers should pay attention to **Section 2**, in particular the scope of testing as outlined in **Section 2.1** as well as the observations noted in **Section 2.2**, to ensure that their own use cases are adequately covered by this scope and results.

SFR is a member of the Avaya DevConnect Service Provider program. Information in these Application Notes has been obtained through DevConnect compliance testing and additional technical discussions. Testing was conducted via the DevConnect Program at the Avaya Solution and Interoperability Test Lab.

Avaya DevConnect Confidential & Restricted. For benefit of SFR only. These Application Notes may not be distributed further without written permission from DevConnect.
