Design With AI Without Losing Your Taste Raphael Westwick, 2025-10-17 Artificial intelligence can accelerate your creative process but it shouldn't erase your individuality. *Design With AI Without Losing Your Taste* teaches artists, designers, and creative professionals how to harness AI as a collaborator, not a replacement. This book walks you through the process of using AI tools for brainstorming, sketching, and refining ideas while maintaining control over aesthetics, emotion, and intent. Learn how to build critique loops that use AI feedback to sharpen, not dilute, your signature style. From crafting effective prompts and curating reference moodboards to analyzing visual output critically, you'll discover practical workflows for keeping your creative voice authentic in the age of automation. Through real-world examples, design frameworks, and mindset shifts, *Design With AI Without Losing Your Taste* helps you establish an intelligent partnership with your tools, one that amplifies intuition rather than imitation. Whether you're a hobbyist exploring new creative tools or a professional building client-ready concepts, this book gives you the language, process, and confidence to use AI while staying true to your artistic identity.

Cognitive Kin Christophe Kolb, Jan Rosen, 2026-03-10 Now that AI has a will, it's up to us to find a way. For decades we built software that did what it was told and nothing else. Agentic AI breaks this bargain: systems that remember, reason, and pursue goals. They arrive less like code and more like colleagues—tireless, fast, and like any new hire, occasionally in need of supervision. In *Cognitive Kin*, Christophe Kolb and Jan Rosen map the threshold where artificial intelligence stops being a feature and becomes a workforce. Drawing on firsthand experience at the frontier of agentic AI, they show how digital labor becomes viable, why org charts give way to networks of intent, and how leadership shifts to orchestration. They translate the machinery—memory, feedback loops, tool use—into plain language, then follow the shockwave into strategy, culture, and governance. This isn't tomorrow's speculation; it's a present-tense transition that is reshaping the meaning of work and creating new sources of value. The advantage will belong to firms that learn to think with thinking things working alongside intelligent systems without outsourcing judgment, meaning, or responsibility.
