

# THE PERFECT BLOG POST

## Goal = Grab Attention

Your headline gets read more than anything else on your website. That's why your headline serves one goal: grab attention so people feel compelled to read your opening.

## Key Insight:

When people make snap decisions about text, they prefer fewer characters per line (CPL). The half-width image shortens the line length of the opening—fewer CPL—thus enticing people to read because it caters to their preferences.

## Connect Emotionally

Your first piece of content should aim to trigger an emotion in your reader. When people get emotional, they pay attention. They're also more likely to take action after being put into an emotional state.

<http://socialtriggers.com/craft-contagious-content>

## Big Promise #2

Here's where you promise people exactly what they'll learn... the step-by-step method... the how to. You already connected, now's the time to get people to take action.

## Buy or Subscribe?

Here's where you close out your article with another call to action. You can include a "buy now" CTA or a "subscribe." I often use subscribe.

## Key Insight:

Direct marketers have long known that if you get people to read your first 3-4 sentences, they're more likely to read your entire article. That said, the point of your opening is to get people to read your opening... and that's it.

<http://socialtriggers.com/power-of-curiousy>

## Big Promise

This sub-headline has one main goal... to entice people to read your first piece of content and that's it. How? Make a promise to your readers... give them a benefit.

## The Soundbite

Use a click to tweet "quote" right here. Why? Who do people quote? People quote authorities. Enticing people to quote you positions you as an authority. Plus, people like tweeting quotes and you'll get more traffic from social media as a result of it.

<http://socialtriggers.com/sound-bites-traffic>

## The How To Section

Give people practical, easy to implement advice. Get people results, and they'll remember you forever. Also, practically useful content is more viral than other types of content.

**Academic and Research Writing: Critical Thinking, Methodology, and Scholarly Writing** Arshad H. Bhat, 2026-01-29 Writing is the medium of transition between thought and knowledge between inner knowledge and open conversation Academic and research writing is not just a technical art but a form of thinking questioning and engaging in the common search of truth The book Academic and Research Writing From Ideas to Publication is authored under the assumption that good writing develops out of good thinking and that both can be developed through practice coaching and self reflection Many students researchers and teachers in any field usually have the same problems how to work out ideas into clear arguments how to use sources in a manner that is ethical how to write confidently or how to fulfill the requirements of academic communities Academic writing is viewed as strict and frightening by many learners and is full of

rules and formalities However deep down academic writing is merely a rigorous kind of dialogue one where writers pay keen attention to what has already been said meditate about ideas and present a line of reasoning of their own The book is structured in a way that it takes readers through the whole process of writing academic and research papers It starts with the basics of academic writing its aims organization and procedures and slowly progresses to the more skilled types like argumentation critical writing disciplinary writing styles clarity of language and lastly publication and presentation of academic work Each chapter is constructed on the one before it and it demonstrates that there is no single writing but it is constant questioning drafting refining and revising The chapters focus on the fact that writing is not anonymous to thinking In writing we learn what we really are sure of what we really know and all that is yet unclear Writing can also make us challenge our thoughts sharpen our arguments and be able to communicate responsibly with others The same main principles regardless of whether it is a case of an essay a research paper a thesis or a journal article are clarity evidence logic and ethical integrity This book targets students early career researchers and teachers who operate in various disciplinary and cultural settings It is aware that academic writing does not take the same form everywhere it varies in different disciplines like humanities social sciences natural sciences and professional studies Simultaneously it emphasizes the common set of values which hold all scholarly writing in common respect towards evidence good judgment and veracity in representation This book is aimed not to give strict formulae but to work out the cognition It does not just present rules but also provides the rationale behind the academic conventions therefore the readers would apply them intelligently instead of applying them blindly Examples explanations and discussions are made in easily accessible language such that even sophisticated concepts regarding writing and research may be comprehended by the learners at various levels Last but not least this book is authored in high regard of learners Being a non writer is not the same as being dumb rather it is learning something complicated that requires time All good writers were already beginners Through patience practice and advice anyone can learn that he can write with clarity make a case and add value to both academic and professional life Should this book assist readers in thinking more clearly writing more confidently and engaging in the world of ideas more it will surely have served its end

*Teaching Reading to All Learners Including Those with Complex Needs* Sarah Moseley, 2023-03-21
