Biodiversity

- The variety of species in a specific area
- Measured by the number of different species that live in a certain area

Why is biodiversity important?

- Living things depend on other living things
 - Animals depend on plants and plants depend on animals to live
- Different populations of organisms have adapted to living together
 - Predators and prey; organisms involved in symbiosis
- Brings stability to an ecosystem
 - Since one species of plant is spread out between other types of plants and animals, it is difficult to wipe out that species completely
