

Biotechnology: Applications to Potato Breeding

Shelley Jansky and Mark Ehlenfeldt

The goal of the potato breeding program at NDSU is to develop superior quality, high yielding and well-adapted cultivars for the Red River Valley and other potato growing regions. The progress of the program relies on traditional breeding techniques and a germplasm base of highly selected material. However, advances in biotechnology which are applicable and available to this program are utilized to enhance productivity.

Somatic fusion hybrids of a wild potato species *S. brevidens* (non-tuber-bearing) and *S. tuberosum* (the cultivated potato) are being grown in the Red River Valley for the first time as part of a co-operative project with Dr. John Helgeson of the University of Wisconsin plant pathology department. The hybrids, produced through fusions of single cells from each of the parents, were made to incorporate the potato leaf roll virus (PLRV) resistance of *S. brevidens* into materials which would be cultivar-compatible. The hybrids are remarkably vigorous and most express PLRV resistance, but because they have a wild species parent they diverge substantially from standard varietal type; yields are lower, tubers are misshapen, and many hybrids have a late maturity. Fortunately many of the hybrids are fertile and can cross readily with varieties.

Since all hybrids in a given fusion derive from the same two parents, studies are initially focusing on evaluation of the range of variation for tuber traits seen among hybrids. Two potential sources of variation exist. One is the variation seen naturally in any materials coming out of tissue culture and referred to as somaclonal variation, the second is variation due to the wild species germplasm. Since *S. brevidens* is non-tuber bearing, it is uncertain what effects, if any, it exerts on tuber quality. It may alter tuber characteristics dramatically or only slightly. This research will get at both of these sources of variation by examining both fusion hybrids and tissue-culture regenerated plants of the variety parent. Specific gravity, reducing sugar, total sugar, tuber dormancy, and glycoalkaloids will be examined.

Besides determining the effects of *S. brevidens* germplasm and the quantitative nature of somaclonal variation, this evaluation will be a good evaluation of the performance of these materials in our environment. This material possesses PLRV resistance and serendipitously has been found to possess excellent Erwinia rot resistance. The best lines from this evaluation will be incorporated into the NDSU breeding program to transfer these traits to upcoming varieties.

Two graduate students are beginning studies of directed variation in tissue-culture-derived plants. These studies will evaluate changes induced through both chromosome loss and chemical alteration of DNA structure, and will evaluate the utility and heritability of variants arising from these treatments.

A major effort is being made to incorporate new sources of wild species germplasm into advanced potato breeding lines. Exotic potato species such as *S. commersonii*, *S. cardiophyllum*, *S. berthaultii*, *S. chacoense* and *S. torjense* are being used to introduce improved characters into varieties. *S. commersonii*, a South American species, possesses high specific gravity and tolerance to both frost and heat. *S. cardiophyllum* possesses yielding ability and attractive smooth tubers.

Unconventional techniques are being employed to incorporate these materials. *S. commersonii* and *S. cardiophyllum* require that their chromosome numbers be doubled simply to cross with diploids. This initial set of crosses yields triploids. These triploids present problems because of their extremely low fertility. A second round of chromosome doubling, or alternatively selection for types producing pollen with double the normal number of chromosomes is required to cross these materials to varieties.

Interspecific *Solanum* hybrids are also being produced to introduce resistance to Colorado potato beetle and green peach aphid. Each of the wild species, *S. neocaudatum*, *S. berthaultii*, *S. torjense*, *S. chacoense*, *S. bulbocastanum*, *S. brachistocarpon*, *S. brevidens*, *S. jamesii*, and *S. trifidum*, possesses resistance to either or both insect pests. Before hybrids are produced, haploids of the cultivated potato must be developed. These haploids contain half as many chromosomes as their cultivar parents, but they have the same number as the wild species. Most wild species cross directly to these haploids. However, as with *S. cardiophyllum* and *S. commersonii*, the chromosome complement of some of these wild species must be doubled before hybridization is successful. A meiotic mutant has been used to effect hybridization and gene transfer into this situation. Preliminary results indicate that some of the potatoes carrying genes from wild species express a high level of resistance to the pests under consideration. The next steps are to evaluate horticultural quality of the tubers and continue to add resistance genes to promising selections.

One potential problem that may develop as a result of extensive utilization of exotic germplasm is an increase in glycoalkaloids in potato tubers. Glycoalkaloids are found in all potatoes, but they may exist in very high levels in some wild species. A high level of glycoalkaloids results in bitter, sometimes inedible tubers. Consequently, this breeding program

Biotechnology Breeding Research And Applications Introduction

Biotechnology Breeding Research And Applications Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Biotechnology Breeding Research And Applications Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Biotechnology Breeding Research And Applications : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Biotechnology Breeding Research And Applications : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Biotechnology Breeding Research And Applications Offers a diverse range of free eBooks across various genres. Biotechnology Breeding Research And Applications Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Biotechnology Breeding Research And Applications Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Biotechnology Breeding Research And Applications, especially related to Biotechnology Breeding Research And Applications, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Biotechnology Breeding Research And Applications, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Biotechnology Breeding Research And Applications books or magazines might include. Look for these in online stores or libraries. Remember that while Biotechnology Breeding Research And Applications, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Biotechnology Breeding Research And Applications eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Biotechnology Breeding Research And Applications full book , it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Biotechnology Breeding Research And Applications eBooks, including some popular titles.

FAQs About Biotechnology Breeding Research And Applications Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Biotechnology Breeding Research And Applications is one of the best book in our library for free trial. We provide copy of Biotechnology Breeding Research And Applications in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Biotechnology Breeding Research And Applications. Where to download Biotechnology Breeding Research And Applications online for free? Are you looking for Biotechnology Breeding Research And Applications PDF? This is definitely going to save you time and cash in something you should think about.
