Lenz,2012-12-06 Ten years ago Bill Gale of AT T Bell Laboratories was primary organizer of the first Workshop on Artificial Intelligence and Statistics In the early days of the Workshop series it seemed clear that researchers in AI and statistics had common interests though with different emphases goals and vocabularies In learning and model selection for example a historical goal of AI to build autonomous agents probably contributed to a focus on parameter free learning systems which relied little on an external analyst s assumptions about the data This seemed at odds with statistical strategy which stemmed from a view that model selection methods were tools to augment not replace the abilities of a human analyst Thus statisticians have traditionally spent considerably more time exploiting prior information of the environment to model data and exploratory data analysis methods tailored to their assumptions In statistics special emphasis is placed on model checking making extensive use of residual analysis because all models are wrong but some are better than others It is increasingly recognized that AI researchers and or AI programs can exploit the same kind of statistical strategies to good effect Often AI researchers and statisticians emphasized different aspects of what in retrospect we might now regard as the same overriding tasks **Online** ,1988 **Perspectives in Web Course Management** Bruce Leslie Mann,2000 Perspectives on Web Course Management is a brilliant text on the latest developments in Internet teaching Chapters include development tools present day efforts in Internet teaching at various institutions and theoretical models of current and future course management Contributors from Canada the United States and Australia focus specifically on managing courses through systems such as WebCT TopClass and Lotus LearningSpace The Information Specialist's Guide to Searching and Researching on the Internet and the World Wide Web Ernest C.
