From Model to Algebra Dr Yeap Ban Har, Algebra is fundamental in the learning of mathematics In Singapore students begin the learning of formal algebra in primary six Singapore Ministry of Education 2006a In secondary school algebra features prominently in the curriculum Singapore Ministry of Education 2006b Prior to learning formal algebra primary school students use the model method as one of the methods to solve word problems The model method is one of the most recognised features of the Singapore mathematics curriculum Singapore Ministry of Education 2009 It has been found that the model method has allowed primary school students without access to formal algebra a means to represent and solve algebraic word problems Ng Willis Beckmann 2004 Secondary school teachers have been trained to show the relationship between the model method and the algebraic method Kho 2007 This book fleshes out this approach using topics in lower secondary algebra This book focuses on helping students develop a strong foundation in algebraic manipulation Basic algebraic manipulations including writing evaluating expanding simplifying and factorising algebraic expressions and solving algebraic equations are introduced pictorially While it is not the intention that students to always rely on pictorial representations when doing algebra the model method serves as a good starting point for students to learn algebraic manipulation meaningfully It is hoped that this book will provide teachers with a resource to help students make the transition from the model method to formal algebra As for students who find formal algebra daunting this book serves as a bridge
