All Clear Connie Willis:

All Clear Connie Willis, 2010-10-19 Winner of the Nebula Award Traveling back in time from Oxford circa 2060 into the thick of World War II was a routine excursion for three British historians eager to study firsthand the heroism and horrors of the Dunkirk evacuation and the London Blitz But getting marooned in war torn 1940 England has turned Michael Davies Merope Ward and Polly Churchill from temporal tourists into besieged citizens struggling to survive Hitler's devastating onslaught And now there's more to worry about than just getting back home The impossibility of altering past events has always been a core belief of time travel theory but it may be tragically wrong When discrepancies in the historical record begin cropping up it suggests that one or all of the future visitors have somehow changed the past and ultimately the outcome of the war Meanwhile in 2060 Oxford the stranded historians supervisor Mr Dunworthy frantically confronts the seemingly impossible task of rescuing his students three missing needles in the haystack of history The thrilling time tripping adventure that began with **Blackout** now hurtles to its stunning resolution in **All Clear** **All Clear** Connie Willis, 2010 From the author of **Blackout** comes the final thrilling instalment of the enormously entertaining story of time travel war and the deeds of ordinary people who shape history **Blackout** Connie Willis, 2010-02-02 Oxford in 2060 is a chaotic place with scores of time traveling historians being sent into the past Michael Davies is prepping to go to Pearl Harbor Merope Ward is coping with a bunch of bratty 1940 evacuees and trying to talk her thesis adviser into letting her go to VE Day Polly Churchill's next assignment will be as a shopgirl in the middle of London's Blitz But now the time travel lab is suddenly canceling assignments and switching around everyone's schedules And when Michael Merope and Polly finally get to World War II things just get worse For there they face air raids blackouts and dive bombing Stukas to say nothing of a growing feeling that not only their assignments but the war and history itself are spiraling out of control Because suddenly the once reliable mechanisms of time travel are showing significant glitches and our heroes are beginning to question their most firmly held belief that no historian can possibly change the past *Connie Willis's Science Fiction* Carissa Turner Smith, 2022-10-31 In spite of Connie Willis's numerous science fiction awards and her groundbreaking history as a woman in the field there is a surprising dearth of critical publication surrounding her work Taking *Doomsday Book* as its cue this collection argues that Connie Willis's most famous novel along with the rest of her oeuvre performs science fiction's task of cognitive estrangement by highlighting our human inability to read the times correctly and yet also affirming the ethical imperative to attempt to truly observe and record our temporal location Willis's fiction emphasizes that doomsdays happen every day and they risk being forgotten by some even as their trauma repeats for others However disasters also have the potential to upend accepted knowledge and transform the social order for the better and this collection considers the ways that Willis pairs comic and tragic modes to reflect these uncertainties *Virtual Dark Tourism* Kathryn N. McDaniel, 2018-04-23 This book takes the concept of dark tourism journeys to sites of death suffering and calamity in an innovative yet essential direction by applying

it to the virtual realms of literature film and television the Internet and gaming Essays focus both on the creative construction of imaginary journeys and the historiographic and civic consequences of such memorializations From World War II time travel novels to Game of Thrones and from Internet reproductions of Rwandan genocide locations to invented tragedies in futuristic domains authors from various fields examine the purpose and influence of simulated travels to morbid sites Designed for a wide audience of scholars and travelers virtual and real this volume raises awareness about the many pathways through which we encounter death experiences in contemporary society What we know about the past or what we think we know about it is shaped daily by such imagined journeys as these

All Clear - Book 4 - Oxford Time Travel Connie Willis,2010 In Blackout award winning author Connie Willis returned to the time traveling future of 2060 the setting for several of her most celebrated works and sent three Oxford historians to World War II England Michael Davies intent on observing heroism during the Miracle of Dunkirk Merope Ward studying children evacuated from London and Polly Churchill posing as a shopgirl in the middle of the Blitz But when the three become unexpectedly trapped in 1940 they struggle not only to find their way home but to survive as Hitler s bombers attempt to pummel London into submission Now the situation has grown even more dire Small discrepancies in the historical record seem to indicate that one or all of them have somehow affected the past changing the outcome of the war The belief that the past can be observed but never altered has always been a core belief of time travel theory but suddenly it seems that the theory is horribly tragically wrong Meanwhile in 2060 Oxford the historians supervisor Mr Dunworthy and seventeen year old Colin Templer who nurses a powerful crush on Polly are engaged in a frantic and seemingly impossible struggle of their own to find three missing needles in the haystack of history Told with compassion humor and an artistry both uplifting and devastating All Clear is more than just the triumphant culmination of the adventure that began with Blackout It s Connie Willis s most humane heartfelt novel yet a clear eyed celebration of faith love and the quiet ordinary acts of heroism and sacrifice too often overlooked by history

Interface between Literature and Science Victoria Carpenter,2015-05-13 The boundaries of science and literature are permeable they are continuously

crossed and illuminated by a variety of narrative forms and their interpretations Changes in our perception of the world are informed in equal measure by scientific and humanistic disciplines This volume treats both literary and scientific texts as products of the human mind therefore abiding by all the rules it creates scientific and humanistic alike The volume does not propose to replace all literary or discourse analysis with a cross disciplinary science based approach but rather uses this theoretical stance when more conventional means fail to explain or even explore the intricacies of a text It argues that scientific discourse can also be analysed through the prism of literary theories since all texts are governed in varying measure by the unity of contexts that characterize their nature the process of their creation and their place in the cognitive realm of humanity This approach will allow the nature and limitations of scientific research to be questioned while opening up more venues to explore scientific creativity that crosses the subject boundaries of science and humanities Latin American literature offers many examples of the interconnection between literary and scientific discourse Notwithstanding the often explored relationship between Jorge Luis Borges s literary themes and contemporary scientific discoveries a more general question should be asked is the influence of scientific thought a privilege of the select few or is it indeed an all pervading experience in Latin American literary narrative from late modernism to present day This book explores the texts that overtly incorporate scientific content or are structured in such a way that immediately reminds the reader of a scientific phenomenon it will also examine the texts that are presented in such a way that a conventional literary analysis does not help penetrate the many narrative layers that the text comprises The volume offers cross disciplinary readings of such authors as Jorge Luis Borges Gabriel Garc a M rquez Ernesto S bato and Gustavo Sainz to name but a few
