Bleaching of Vegetable Oil using Organic Acid Activated Fuller's Earth (Bentonite Clay)

By Atif Khan

University of Engineering and Technology, Pakistan

Abstract - Vegetable oil is one of the basic food items which is consumed by almost every human being in this universe. Therefore quality of vegetable oil should be good enough so that it accounts for healthy life. In vegetable oil manufacturing there are four major steps involved which are neutralization, degumming, bleaching and deodorization. Among these steps bleaching is the very important and critical step because it ensures the good color and odor of vegetable oil. The famous method of bleaching in Pakistan is adsorption by inorganic acid activated fuller's earth (bentonite clay). Treatment with inorganic acid (Sulfuric acid and hydrochloric acid) activated bentonite clay is very efficient and shows satisfactory results. But there is a major disadvantage associated with its use. Fumes of hydrochloric acid or sulfuric acid are very dangerous for both the equipment and labor involved in manufacturing of vegetable oil. Therefore the safety of the labor and equipment is compromised. The major purpose of this research work is to give the alternative method for activation procedure of bentonite clay and this method should be the safest method for both the labor and equipment used in vegetable oil industry.

Bleaching of Vegetable Oil Using Organic Acid Activated Fuller's Earth Khan Atif, Javed Hassan, 2015-08-26

Specific properties of bentonite clay have made them a valuable material in different process industries. Easy availability, low price, and their effectiveness are the major factors which made fuller's earth an adsorbent in cooking oil manufacturing industry. Textural characteristics of fuller's earth play an important role in its performance. These characteristics can be modified by treatment with organic acids, which is the safest method for enhancing the properties of fuller's earth. Major motivation of this research is to increase the adsorption capacity of fuller's earth by modification in its properties by organic acid treatment. Organic acid treatment assures the safety of equipment and safety of the labor as well. Four organic acids are used, which are recommended best for activation. These acids are acetic acid, phosphoric acid, citric acid, and oxalic acid. Clay is treated with all of these four acids, and the acid which generates more active sites in clay is the best recommended acid for activation.

Edible Oil Processing from a Patent Perspective Albert J. Dijkstra, 2012-09-28. Patent literature has always been a mine of information, but until recently it was difficult to access. Now with the Internet, access to all patent documents is almost instantaneous and free. However, interpreting the technical information provided by patent literature requires a certain skill. This monograph aims to provide that skill by explaining patent jargon and providing background information on patenting. Patents dealing with edible oil processing are used to explain various aspects of patenting. To make the explanations less impersonal, some have been larded with personal remarks and experiences. Accordingly, this monograph is intended for scientists and engineers dealing with edible oils and fats who want to extend their sources of technical information. Hopefully, it will inspire them to innovate, help them to avoid duplication, and provide them with some amusement.

Use of Domestic Minerals for Vegetable Oil Bleaching Yasemin Erten, İzmir Yüksek Teknoloji Enstitüsü, 2004. In this thesis, acid activation and characterization studies were conducted for different clay samples, and bleaching capacity of the selected acid-activated clay samples for sunflower oil were determined. The samples selected for this study were naturally occurring clays from Ankara and Eskişehir regions. The acid-activated zeolite was also used for the purpose to compare its bleaching performance with commercial bleaching clay Tonsil and the acid-activated clays. The clay minerals were activated with hydrochloric acid (HCl) at three acid concentrations (1 N, 3 N, 5 N), activation times (1 h, 2 h, 3 h), and different dry clay:acid ratios. The clay samples from the Ankara and Eskişehir regions were defined as montmorillonite according to X-ray diffraction (XRD). XRD results proved that acid activation caused structural changes in the treated montmorillonites; montmorillonite peaks gradually disappeared and yielded to an amorphous montmorillonite structure. The TGA results showed a significant weight loss between 30 °C–200 °C (15% for the Ankara clay and 12% for the Eskişehir clay). This was most probably due to the removal of free and hydrogen-bonded water molecules. Maximum surface area was obtained for the acid-activated Ankara clay treated with 1 N HCl for 3 hours. It was determined to be 849.1 m²/g. Also, maximum surface area was 269.7 m²/g.

for the acid activated Eskişehir clay treated with 5 N HCl for 1 hour. Then the surface area of the acid activated clays decreased sharply with the acid activation. The chemical compositions of the solutions and clays after acid activation were determined using ICP and EDX analysis respectively. According to the results, the dissolution amount of CaO, Na₂O, MgO, K₂O, Fe₂O₃ and Al₂O₃ increased along with increasing acid concentration and treatment time. The SiO₂ content and the SiO₂/Al₂O₃ ratio increased as a result of dissolving of aluminium ions. This ratio increased from 6.0 to 7.5 for the acid activated Eskişehir clay and from 2.7 to 3.9 for acid activated Ankara clay. Acid activated clays were tested for the assessment of their bleaching efficiency for sunflower oil in the laboratory. Bleaching tests were carried out with earths prepared at different acid activation conditions such as acid concentration and activation times. The absorbance value was measured at 455 nm and found to be 0.429 for the neutralized sunflower oil. Peroxide value and free fatty acid content of the neutralized oil were found to be 16.8 meq/kg and 0.07 % respectively. The oil bleached with the acid activated Ankara clay had a peroxide value of 46.2 meq/kg first which decreased to 22.4 meq/kg and the free fatty acid content was observed to be around 0.08 %. For acid activated Eskişehir clay peroxide value of the bleached oil initially increased up to 31.2 meq/kg then decreased under the peroxide value of neutralized oil 16.8 meq/kg and free fatty acid content of bleached oil approximately was around 0.09 %. The bleaching parameters which were used for testing were 1 % earth concentration and 30 minutes contact time at 100 °C bleaching temperature. At these selected parameters acid activated Eskişehir clay (5 N, 1h HCl treatment), Ankara clay (1 N, 3h HCl treatment) and zeolite (2 N, 6h HNO₃ treatment) were compared with the commercial bleaching clay Tonsil. The smallest value of absorbance and bleaching efficiency were found to be 0.084 and 80 % respectively with the Eskişehir clay and these values were determined to be 0.083 and 81 % with the Tonsil under the same conditions. The absorbance value and bleaching efficiency of the bleached oil with acid activated Ankara clay were determined to be 0.114 and 73 % respectively using the selected bleaching parameters. Bleaching performance of Ankara clay was found to be lower when compared with the result of Eskişehir clay. At the selected bleaching point, results of Lovibond red and yellow color of bleached oil indicated that the Eskişehir clay and Tonsil were close to each other in bleaching efficiency. Red color 0.8 and 1.1, yellow color 20 and 20 for Tonsil and Eskişehir clay respectively. Zeolite did not reach the required bleaching performance. The bleaching efficiency was 25 % with raw zeolite and it hardly increased to 46 % with the acid activated zeolite. In addition, red and yellow color values were higher than the other clays, red color 2.6, yellow color 30. As a result, Eskişehir clay gave a better bleaching performance compared to Ankara clay and Zeolite. Maximum bleaching efficiency was achieved after 30 minutes of contact time with 1 % earth concentration at 100 °C bleaching temperature following 5 N, 1h HCl treatment for Eskişehir clay.

The book delves into Bleaching Of Vegetable Oil Using Organic Acid Activated. Bleaching Of Vegetable Oil Using Organic Acid Activated is an essential topic that needs to be grasped by everyone, ranging from students and scholars to the general public. The book will furnish comprehensive and in-depth insights into Bleaching Of Vegetable Oil Using Organic Acid Activated, encompassing both the fundamentals and more intricate discussions.

1. This book is structured into several chapters, namely:
 - Chapter 1: Introduction to Bleaching Of Vegetable Oil Using Organic Acid Activated
 - Chapter 2: Essential Elements of Bleaching Of Vegetable Oil Using Organic Acid Activated
 - Chapter 3: Bleaching Of Vegetable Oil Using Organic Acid Activated in Everyday Life
 - Chapter 4: Bleaching Of Vegetable Oil Using Organic Acid Activated in Specific Contexts
 - Chapter 5: Conclusion
 2. In chapter 1, this book will provide an overview of Bleaching Of Vegetable Oil Using Organic Acid Activated. This chapter will explore what Bleaching Of Vegetable Oil Using Organic Acid Activated is, why Bleaching Of Vegetable Oil Using Organic Acid Activated is vital, and how to effectively learn about Bleaching Of Vegetable Oil Using Organic Acid Activated.
 3. In chapter 2, the author will delve into the foundational concepts of Bleaching Of Vegetable Oil Using Organic Acid Activated. The second chapter will elucidate the essential principles that must be understood to grasp Bleaching Of Vegetable Oil Using Organic Acid Activated in its entirety.
 4. In chapter 3, this book will examine the practical applications of Bleaching Of Vegetable Oil Using Organic Acid Activated in daily life. The third chapter will showcase real-world examples of how Bleaching Of Vegetable Oil Using Organic Acid Activated can be effectively utilized in everyday scenarios.
 5. In chapter 4, this book will scrutinize the relevance of Bleaching Of Vegetable Oil Using Organic Acid Activated in specific contexts. This chapter will explore how Bleaching Of Vegetable Oil Using Organic Acid Activated is applied in specialized fields, such as education, business, and technology.
 6. In chapter 5, this book will draw a conclusion about Bleaching Of Vegetable Oil Using Organic Acid Activated. This chapter will summarize the key points that have been discussed throughout the book.
- The book is crafted in an easy-to-understand language and is complemented by engaging illustrations. This book is highly recommended for anyone seeking to gain a comprehensive understanding of Bleaching Of Vegetable Oil Using Organic Acid Activated.

Bleaching Of Vegetable Oil Using Organic Acid Activated Introduction

In today's digital age, the availability of Bleaching Of Vegetable Oil Using Organic Acid Activated books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and

carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Bleaching Of Vegetable Oil Using Organic Acid Activated books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Bleaching Of Vegetable Oil Using Organic Acid Activated books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Bleaching Of Vegetable Oil Using Organic Acid Activated versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Bleaching Of Vegetable Oil Using Organic Acid Activated books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Bleaching Of Vegetable Oil Using Organic Acid Activated books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Bleaching Of Vegetable Oil Using Organic Acid Activated books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Bleaching Of Vegetable Oil Using Organic Acid Activated books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access

a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Bleaching Of Vegetable Oil Using Organic Acid Activated books and manuals for download and embark on your journey of knowledge?

FAQs About Bleaching Of Vegetable Oil Using Organic Acid Activated Books

1. Where can I buy Bleaching Of Vegetable Oil Using Organic Acid Activated books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Bleaching Of Vegetable Oil Using Organic Acid Activated book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Bleaching Of Vegetable Oil Using Organic Acid Activated books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are Bleaching Of Vegetable Oil Using Organic Acid Activated audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores.

Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.

9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read Bleaching Of Vegetable Oil Using Organic Acid Activated books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
