Changing Geographies of Fashion in the European Semi-Periphery Monika Murzyn-Kupisz, 2026-01-01 Sustainability in fashion production and consumption is considered a major contemporary challenge and at the same time a visible trend in the fashion market Despite a growing body of academic literature on the topic detailed analyses have so far mainly pertained to only a selected dimension of the fashion market design production retail or consumption They have more often explored major fashion centres brands and firms rather than independent designers SMEs or independent fashion events and other alternative consumption means and spaces or less obvious intermediaries in the fashion market Although the issue of sustainable fashion has been noticed in the academic discourse in Poland it is yet to be examined bringing together the production and consumption side of the issue Nor has the spatial dimension of fashion market transformation in Poland been analysed in detail Taking a geographic perspective this book fills

this research gap by presenting a holistic approach to the fashion market including design production and consumption of fashion considering the social cultural and spatial dimensions of the matter and diverse stakeholders who participate in it Providing a comprehensive analysis of long term changes in the Polish fashion market the book addresses several interesting issues These include the extent to which the sustainable reorientation of the fashion market accompanies the broader processes of adaptation restructuring and upgrading of the textile and clothing sector how it fits into the broader logic of culturalisation of clothing production and commercialisation of design as an applied artistic genre and a part of the creative sector and to what extent it is connected with new alternative consumption patterns with respect to channels places and spaces of clothing purchases and re use The main premise of the book is that although it is still a relatively small part of the fashion market in Poland sustainable fashion design production and consumption is an increasingly important phenomenon with significant social economic and spatial implications The book therefore argues that sustainable design and production constitute a promising opportunity for adaptation restructuring and upgrading of the textile and clothing sector in the European semi periphery Using the metaphor of the fashion ecosystem it also illustrates how sustainable fashion practices contribute to the creation of new links and networks within the fashion industry alongside a more fragmented domestic production structure Chapter 1 and 9 are licensed under the terms of the Creative Commons Attribution 4 0 International License a href <http://creativecommons.org/licenses/by/4.0/> http://creativecommons.org/licenses/by/4.0/ a For further details see license information in the chapters

Soviet Consumer Culture in the Brezhnev Era Natalya Chernyshova,2013-06-26 After decades of turmoil and trauma the Brezhnev era brought stability and an unprecedented rise in living standards to the Soviet Union enabling ordinary people to enjoy modern consumer goods on an entirely new scale This book analyses the politics and economics of the state s efforts to improve living standards and shows how mass consumption was often used as an instrument of legitimacy ideology and modernization However the resulting consumer revolution brought its own problems for the socialist regime Rising well being and the resulting ethos of consumption altered citizens relationship with the state and had profound consequences for the communist project The book uses a wealth of sources to explore the challenge that consumer modernity was posing to Soviet mature socialism between the mid 1960s and the early 1980s It combines analysis of economic policy and public debates on consumerism with the stories of ordinary people and their attitudes to fashion Western goods and the home The book contests the notion that Soviet consumers were merely passive abused eternally queuing victims and that the Brezhnev era was a period of stagnation arguing instead that personal consumption provided the incentive and the space for individuals to connect and interact with society and the regime even before perestroika This book offers a lively account of Soviet society and everyday life during a period which is rapidly becoming a new frontier of historical research
