

Practice problems for the Math Olympiad

<Problem #7>

Prove that there are infinitely many positive integers which are not representable as a sum of cubes of two other positive integers.

Proof: Let us fix a positive integer n and let $1 \leq x \leq n^3$. Let us assume the positive number x can be represented as a sum of two cubes of two positive integers, i.e. $x = a^3 + b^3$. Then it is clear that

$$1 \leq a \leq n \text{ and } 1 \leq b \leq n$$

So there are n distinct a for $1 \leq a \leq n$ and there are n distinct b for $1 \leq b \leq n$. Therefore, there are no more than n^2 such pairs of a, b for which $x = a^3 + b^3 \leq n^3$. And there are n^3 distinct x such that $1 \leq x \leq n^3$. So there are at least $n^3 - n^2$ integers not representable as a sum of cubes of two positive integers. Since $n^3 - n^2$ is a polynomial of positive degree with a leading coefficient 1, it can be made arbitrary large by making n sufficiently large. This proves the theorem.

<Problem #8>

Show that a positive integer is divisible by 9 if and only if the sum of its digits is divisible by nine.

Proof: The n -digit positive integer

$$\overline{a_n a_{n-1} \dots a_2 a_1 a_0} = a_n \times 10^n + a_{n-1} \times 10^{n-1} + \dots + a_2 \times 10^2 + a_1 \times 10 + a_0, \quad (8.1)$$

where $a_0, a_1, a_2, \dots, a_{n-1}, a_n$ are digits (meaning integers from 0 to 9) and $a_n \neq 0$.

Rewriting (8.1) by using $10^i = 10 \cdot 9 + 1$, we get

$$\begin{aligned} & \overline{a_n a_{n-1} \dots a_2 a_1 a_0} \\ &= a_n \times \left(\underset{9}{\overbrace{9 \cdot 9 + 1}} \right) + a_{n-1} \times \left(\underset{9}{\overbrace{9 \cdot 9 + 1}} \right) + \dots + a_2 \times (99 + 1) + a_1 \times (9 + 1) + a_0 \\ &= a_n \times \underset{9}{\overbrace{9 \cdot 9}} + a_{n-1} \times \underset{9}{\overbrace{9 \cdot 9}} + \dots + a_2 \times \underset{9}{\overbrace{99}} + a_1 \times 9 + (a_n + a_{n-1} + \dots + a_2 + a_1 + a_0) \end{aligned}$$

Mathematical circles with their question driven approach and emphasis on problem solving expose students to the type of mathematics that stimulates the development of logical thinking creativity analytical abilities and mathematical reasoning These skills while scarcely introduced at school are in high demand in the modern world This book a sequel to Mathematical Circle Diaries Year 1 teaches how to think and solve problems in mathematics The material distributed among twenty nine weekly lessons includes detailed lectures and discussions sets of problems with solutions and contests and games In addition the book shares some of the know how of running a mathematical circle The book covers a broad range of problem solving strategies and proofing techniques as well as some more advanced topics that go beyond the limits of a school curriculum The topics include invariants proofs by contradiction the Pigeonhole principle proofs by coloring double counting combinatorics binary numbers graph theory divisibility and remainders logic and many others When students take science and computing classes in high school and college they will be better prepared for both the foundations and advanced material The book contains everything that is needed to run a successful mathematical circle for a full year This book written by an author actively involved in teaching mathematical circles for fifteen years is intended for teachers math coaches parents and math enthusiasts who are interested in teaching math that promotes critical thinking Motivated students can work through this book on their own In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people their parents and teachers and the mathematics profession

THE CHINESE-AMERICAN METHOD Linda Hu; John X. Wang,2013-01-24 Raising a child is challenging for many parents especially for a new immigrant family For those parents they not only have to face the challenges of integrating themselves into a new environment but they also need to handle the conflicts coming from two cultural backgrounds Like many Chinese Americans the authors inherited the traditional Chinese culture Yet they also opened their minds and embraced their new culture Through the collisions of these two cultures they developed a unique parenting strategy a combination of the best of both worlds to educate their children This approach offered them a cutting edge in developing their children to be among the most competitive As they raised their children they held parties to build their children s social groups used teamwork to create a harmonious family strengthening the family bonds helped their children excel in academic competitions taught their children how to be rigorous and strive for perfection inspired their children to explore innovative strategies to overcome obstacles developed their children s creativity leadership and initiative encouraged their children to

be involved in the community and gave their children freedom to develop their individual personalities and discover their full potentials The authors believe that their story will be beneficial to other parents and also provide a new perspective of Chinese American families for mainstream Americans
