Mathematics Of Machine Learning Lecture Notes:

Advanced Lectures on Machine Learning Shahar Mendelson, Alexander J. Smola, 2003-07-01 Machine Learning has become a key enabling technology for many engineering applications and theoretical problems alike To further discussions and to disseminate new results a Summer School was held on February 11-22 2002 at the Australian National University The current book contains a collection of the main talks held during those two weeks in February presented as tutorial chapters on topics such as Boosting Data Mining Kernel Methods Logic Reinforcement Learning and Statistical Learning Theory The papers provide an in depth overview of these exciting new areas contain a large set of references and thereby provide the interested reader with further information to start or to pursue his own research in these directions Complementary to the book a recorded video of the presentations during the Summer School can be obtained at <http://mlg.anu.edu.au/summer2002> It is our hope that graduate students lecturers and researchers alike will find this book useful in learning and teaching Machine Learning thereby continuing the mission of the Summer School Canberra November 2002 Shahar Mendelson Alexander Smola Research School of Information Sciences and Engineering The Australian National University Thanks and Acknowledgments We gratefully thank all the individuals and organizations responsible for the success of the workshop

Mathematics of Deep Learning Leonid Berlyand, Pierre-Emmanuel Jabin, 2023-04-27 The goal of this book is to provide a mathematical perspective on some key elements of the so called deep neural networks DNNs Much of the interest in deep learning has focused on the implementation of DNN based algorithms Our hope is that this compact textbook will offer a complementary point of view that emphasizes the underlying mathematical ideas We believe that a more foundational perspective will help to answer important questions that have only received empirical answers so far The material is based on a one semester course Introduction to Mathematics of Deep Learning for senior undergraduate mathematics majors and first year graduate students in mathematics Our goal is to introduce basic concepts from deep learning in a rigorous mathematical fashion e.g. introduce mathematical definitions of deep neural networks DNNs loss functions the backpropagation algorithm etc We attempt to identify for each concept the simplest setting that minimizes technicalities but still contains the key mathematics
