The Death of Expertise Thomas M. Nichols,2024 In the early 1990s a small group of AIDS denialists including a University of California professor named Peter Duesberg argued against virtually the entire medical establishment s consensus that the human immunodeficiency virus HIV was the cause of Acquired Immune Deficiency Syndrome Science thrives on such counterintuitive challenges but there was no evidence for Duesberg s beliefs which turned out to be baseless Once researchers found HIV doctors and public health officials were able to save countless lives through measures aimed at preventing its transmission

The Weaponization of Expertise Jacob Hale Russell,Dennis Patterson,2025-03-04 The problem with expertise and the dark side of the equation knowledge power Experts are not infallible Treating them as such has done us all a grave disservice and as *The Weaponization of Expertise* makes painfully clear given rise to the very populism that all knowing experts and their elite coterie decry Jacob Hale Russell and Dennis Patterson use the devastating example of the COVID 19 pandemic to illustrate their case revealing how the hubris of all too human experts undermined perhaps irreparably public faith in elite policymaking Paradoxically by turning science into dogmatism the overweening elite response has also proved deeply corrosive to expertise itself in effect doing exactly what elite policymakers accuse their critics of doing A much needed corrective to a dangerous blind faith in expertise *The Weaponization of Expertise* identifies a cluster of pathologies that have enveloped many institutions meant to help referee expert knowledge in particular a disavowal of the doubt uncertainty and counterarguments that are crucial to the accumulation of knowledge At a time when trust in expertise and faith in institutions are most needed and most lacking this work issues a stark reminder that a crisis of misinformation may well begin at the top

Mathematics Matters in Education Yeping Li,W. James Lewis,James J. Madden,2017-10-03 This book is inspired by Roger E Howe s contributions to the international communities of mathematics and mathematics education Renowned for his research contributions in the fields of representation theory automorphic forms harmonic analysis and invariant theory Dr Howe has also fundamentally deepened our understanding of the mathematics taught in the early school grades and has challenged and stimulated mathematicians and mathematics educators to work together to examine this part of the

mathematical universe more critically and in imaginative new ways This volume will help summarize and highlight Howe s contributions to several topic areas in mathematics education demonstrating the possibility and importance of engaging mathematicians in high impact research in mathematics education and showcasing the importance of cross disciplinary collaboration and exchange *Igniting Social Action in the ELA Classroom* Robyn Seglem,Sarah Bonner,2022 This practical book provides teachers with step by step guidance for developing a class culture that welcomes curiosity and ignites social action Student driven inquiry has a lasting impact on learning yet questions posed from students own contexts rarely serve to shape their understanding of the outside world The authors show teachers how to use literature to introduce characters and worlds that exist outside of their students lived experiences Through this exposure students can develop questions that seek to build empathy for others which ultimately positions young people to be change agents in their communities and in the larger world This book translates ideas from theorists in critical literacy student motivation and culturally responsive pedagogy into practical approaches for the English language arts and social studies classroom 6 12 Each chapter poses questions designed to get teachers thinking about how to use mind opening texts with students to address social problems Book Features Shows teachers how to use literature to help students navigate a shifting world Equips students with the skills to advocate for themselves and others including using digital tools in meaningful effective ways Asks students to face controversial points of view head on and interrogate the world in which they live Includes examples of discussions that lead to projects and opportunities that allow youth to do work in the community Demonstrates how to move theory into practice providing teachers with the rationale for using inquiry as disruption if questioned by stakeholders Contains a scope and sequence that outlines an entire year devoted to inquiry as well as how to break it down into individual units and lessons
