Spring Boot is an open source Java based framework used to create stand alone production grade Spring based applications with minimal setup and configuration. What are the key features of Spring Boot? Some key features include Auto configuration. It automatically configures the Spring application based on dependencies present in the class path. Starter dependencies. Pre configured dependencies to simplify dependency management. Embedded servers. It provides support for embedding servlet containers like Tomcat, Jetty and Undertow. Production ready features. It includes features like metrics, health checks and externalized configuration. Explain the difference between Spring and Spring Boot. How does Spring Boot simplify the development process? Spring Boot simplifies development by providing defaults for configuration, reducing the amount of boilerplate code and offering a range of pre built features and plugins. What is Spring Boot Starter? Spring Boot Starter is a set of convenient dependency descriptors that you can include in your application. You can add starters to your application's class path and Spring Boot will automatically configure the appropriate dependencies based on the libraries present. How does Spring Boot handle configuration? Spring Boot uses convention over configuration and auto configuration to minimize the need for explicit configuration. It provides sensible defaults for configuration and automatically configures components based on the classpath and application properties. What is Spring Boot Actuator? Spring Boot Actuator is a set of production ready features that help you monitor and manage your application. It includes endpoints for health checks, metrics, info, environment details and more. Service is used to mark a class as a service component in the business layer. Repository is used to mark a class as a data access component in the persistence layer. Controller is used to mark a class as a controller component in the presentation layer, typically for handling HTTP requests. How does Spring
