$$\text{or, } v = 2.449 \times 10^8 \text{ m/s. (Ans):}$$

[2] A Cube is at rest in the S-frame. To an observer in the S' frame moving with a velocity of  $2.4 \times 10^8 \text{ m/s}$  relative to the cube parallel to one edge, the volume of the solid is  $4.8 \text{ m}^3$ . Determine the Proper volume of the cube.

Ans: Let, Proper volume =  $V'$   
Improper volume =  $V$

$$V = l_x l_y l_z = l_x' \sqrt{1 - \frac{v^2}{c^2}} \cdot l_y' l_z'$$

$$= V' \sqrt{1 - \frac{v^2}{c^2}}$$

$$V' = \frac{V}{\sqrt{1 - \frac{v^2}{c^2}}} = \frac{4.8}{\sqrt{1 - \left(\frac{2.4}{3}\right)^2}} \text{ m}^3 = 8 \text{ m}^3 \text{ (Ans):}$$

**Special Relativity** Michael Tsampanlis, 2010-05-17 Writing a new book on the classic subject of Special Relativity on which numerous important physicists have contributed and many books have already been written can be like adding another epicyle to the Ptolemaic cosmology Furthermore it is our belief that if a book has no new elements but simply repeats what is written in the existing literature perhaps with a different style then this is not enough to justify its publication However after having spent a number of years both in class and research with relativity I have come to the conclusion that there exists a place for a new book Since it appears that somewhere along the way mathematics may have obscured and prevailed to the degree that we tend to teach relativity and I believe theoretical physics simply using heavier mathematics without the inspiration and the mastery of the classic physicists of the last century Moreover current trends encourage the application of techniques in producing quick results and not tedious conceptual approaches resulting in long lasting reasoning On the other hand physics cannot be done a la carte stripped from philosophy or to put it in a simple but dramatic context A building is not an accumulation of stones As a result of the above a major aim in the writing of this book has been the distinction between the mathematics of Minkowski space and the physics of relativity
