

Thinking Sociologically

In modern and postmodern society, no one is an island. Our life and work are closely related to other people's, groups' and organizations', and this affects every aspect of our life. Therefore, everyone should have some fundamental knowledge of sociology, a discipline which probes into the nature and characteristics of the relationship between individuals and society.

In Text A, Leonard Cargan and Jeanne H. Ballantine provide broad and concise ideas about the links between sociology and individuals. You are invited to ponder: What is sociology? Why should we learn sociology? What can we learn from sociology? What work do sociologists do? How is sociology useful to us and to the world? In Text B, the sociologist C. Wright Mills points out the troubles modern individuals face and analyses the relationship between these troubles and our fast changing society. Hopefully, with some sociological imagination, we will be able to develop solutions to some of these problems.

The Making of a Modern Art World Pedith Pui Chan, 2017-03-06 The Making of A Modern Art World explores the artistic institutions and discursive practices prevailing in Republican Shanghai aiming to reconstruct the operational logic and the stratified hierarchy of Shanghai's art world Using guohua as the point of entry this book interrogates the discourse both of guohua itself and the wider discourse of Chinese modernism in the visual arts In the light of the sociological definition of art world this book contextualizes guohua through focusing on the modes of production and consumption of painting in Shanghai examining newly adopted modern artistic practices namely art associations periodicals art colleges exhibitions and the art market

Pan-African Aesthetics Lena Dallywater, 2025-11-17 Pan Africanism has been a global project aiming to unite people of African descent since the late nineteenth century Notions of Black and African arts and aesthetics have functioned as a bridge and brought positive identification across national ethnic or class divides even when rifts have appeared unbridgeable They were able to mediate Africinity positively both prior to and during the struggle for liberation and at times when the dream of a unified African nation died This study explores central aspects proponents and opponents of Pan African aesthetics and shows that conceptualizations of Black African and Afrocentric aesthetics form a kaleidoscope that is constantly changing Based on historical sources in depth reading and qualitative interviews the study illustrates what happened to the discussions in the postcolonial era The story unfolds along the life paths and approaches of four intellectuals from Anglophone and Francophone Africa Their framings can tell us more about the underlying themes contestations and contradictions of emancipatory projects in the mid twentieth century and show us that the study of Pan Africanism is not yet exhausted neither is the history of the idea and the movement

Workers of the World, Enjoy! Kenneth H. Tucker, 2012-06-15 The aesthetic politics of social movements turn public life into a public stage where mutual displays of performance often trump rational debate and urban streets become sites of festivals and carnival In his penetrating new book *Workers of the World Enjoy* Kenneth Tucker provides a new model for understanding social change in our image saturated and aesthetically charged world As emotional and artistic images inform our perceptions and evaluation of politics art and performance often provide new and creative ways of understanding self and society Spanning the nineteenth twentieth and twenty first centuries *Workers of the World Enjoy* uses examples from major social movements that have dramatically changed the dominant capitalist society often in the name of labor Tucker investigates how class and culture develop as he raises questions about what it means for public life and social movements when politics and drama come together Tucker catalogues how aesthetic politics influences social movements from French Revolutionary syndicalism and fascism to the selling of the President and the street theater of the contemporary global justice movement He also discusses the work of political theorists including Jurgen Habermas Jeffrey Alexander and Nancy Fraser to critique the ways public sphere has been studied

Verdi and the Germans Gundula Kreuzer, 2010-08-26 This book explores how the reception of Italian opera

epitomised by Verdi influenced changing ideas of German musical and national identity **Meaning and Method** Isaac Reed, Jeffrey C. Alexander, 2015-11-17 Culture is increasingly important to American social science but in what way This book addresses the core issues of the sociology of culture questions about the social role of meaning along with those about the methods sociologists use to study culture and society in a manner that makes clear their relevance to sociology as a whole Part I consists of essays by leading cultural sociologists on how the turn to culture has changed the sociological study of organizations economic action and television and concludes with Georgina Born's methodological statement on the sociology of art and cultural production Part II contains a highly original and at times heated debate between Richard Biernacki and John H Evans on the appropriateness of abstract and quantifiable coding schemes for the sociological study of culture Ranging from the philosophy of science to the concrete practical problems of interpreting masses of cultural data the debate raises the controversy over the interpretation of culture and the explanation of social action to a new level of sophistication

The Novelist in the Novel Elizabeth King, 2023-11-14 Why do writers so often write about writers This book offers the first comprehensive account of the phenomenon of the fictional novelist as a character in literature arguing that our notions of literary genius and what it means to be an author are implicitly shaped by and explicitly challenged in novels about novelists a genre that has been critically underexamined Employing both close and distant reading techniques to analyse a large corpus of author stories The Novelist in the Novel explores the forms and functions of author stories and the characters within them offering a new theory that frames these works as textual sites at which questions of literary value and the cultural conceptions around authorship are constantly being negotiated and revised in a form of covert criticism aimed directly at readers While nineteenth century novels about novelists reveal a pervasive frustration with the market a starving artist vs commercial sell out dichotomy modernist examples of the genre focus on the development of the individual author as artist entirely aloof from the marketplace and from the literary sphere at large Yet each of these dynamics is gendered with women denigrated to commercial producers and men elevated to artists and while the canon has largely supported the male view of authorship a closer look at the work of women writers from this period reveals concerted attempts to counteract it Silly Lady Novelists are pitted against serious male modernists in a battle to define what it means to be a literary genius
