

Phys. 807 — Statistical Mechanics

Solution.

(a)

Suppose the wheel moves with velocity v to the right and consider the point on the rim which was passing origin at $t = 0$. At time t the wheel rotates at the angle $\theta = \omega t = \frac{v}{a}t$ clockwise so in wheel's frame the coordinates of the point would be

$$x' = -a \sin \omega t, \quad y' = a(1 - \cos \omega t)$$

However, during time t the center of the wheel shifts to the right at $x_0 = vt = \omega a$ so the coordinates of the point in rest frame are

$$x = x' + \omega t = x' = -\omega t - a \sin \omega t, \quad y' = a(1 - \cos \omega t)$$

Eliminating t in favor of $\theta = \omega t$ we get

$$x = a(\theta - \sin \theta), \quad y = a(1 - \cos \theta)$$

The cycloid turned upside down is

$$x = a(\theta - \sin \theta), \quad y = a(-1 + \cos \theta) = -2a \sin^2 \frac{\theta}{2} \quad (1)$$

Next, using

$$\begin{aligned} dx &= a(1 - \cos \theta)d\theta = 2a \sin^2 \frac{\theta}{2} d\theta \\ dy &= -a \sin \theta = -2a \sin \frac{\theta}{2} \cos \frac{\theta}{2} d\theta \end{aligned}$$

we get the element of the length of the cycloid

$$ds = \sqrt{dx^2 + dy^2} = 2a \sin \frac{\theta}{2} d\theta$$

so the distance measured along the cycloid from the lowest point is

$$s = \int_0^\theta ds' = 2a \int_0^\theta d\theta' \sin \frac{\theta'}{2} = 4a \cos \frac{\theta}{2} \quad (2)$$

Introduction To Statistical Mechanics John Dirk Walecka, 2011-08-12 The science of statistical mechanics is concerned with defining the thermodynamic properties of a macroscopic sample in terms of the properties of the microscopic systems of which it is composed The aim of this book is to provide a clear logical and self contained treatment of equilibrium statistical mechanics starting from Boltzmann's two statistical assumptions and to present a wide variety of applications to diverse physical assemblies The coverage is enhanced and extended through an extensive set of accessible problems An appendix provides an introduction to non equilibrium statistical mechanics through the Boltzmann equation and its extensions The book assumes introductory courses in classical and quantum mechanics as well as familiarity with multi variable calculus and the essentials of complex analysis Some knowledge of thermodynamics is assumed although the book starts with an appropriate review of that topic The targeted audience is first year graduate students and advanced undergraduates in physics chemistry and the related physical sciences The goal of this text is to help the reader obtain a clear working knowledge of the very useful and powerful methods of equilibrium statistical mechanics and to enhance the understanding and appreciation of the more advanced texts Introduction To Statistical Mechanics: Solutions To Problems

John Dirk Walecka, 2016-08-25 Statistical mechanics is concerned with defining the thermodynamic properties of a macroscopic sample in terms of the properties of the microscopic systems of which it is composed The previous book Introduction to Statistical Mechanics provided a clear logical and self contained treatment of equilibrium statistical mechanics starting from Boltzmann's two statistical assumptions and presented a wide variety of applications to diverse physical assemblies An appendix provided an introduction to non equilibrium statistical mechanics through the Boltzmann equation and its extensions The coverage in that book was enhanced and extended through the inclusion of many accessible problems The current book provides solutions to those problems These texts assume only introductory courses in classical

and quantum mechanics as well as familiarity with multi variable calculus and the essentials of complex analysis Some knowledge of thermodynamics is also assumed although the analysis starts with an appropriate review of that topic The targeted audience is first year graduate students and advanced undergraduates in physics chemistry and the related physical sciences The goal of these texts is to help the reader obtain a clear working knowledge of the very useful and powerful methods of equilibrium statistical mechanics and to enhance the understanding and appreciation of the more advanced texts
