Johnson, 2018-05-17 In this book Eugene J Johnson traces the invention of the opera house a building type of world wide importance Italy laid the foundation theater buildings in the West in architectural spaces invented for the commedia dell'arte in the sixteenth century and theaters built to present the new art form of opera in the seventeenth Rulers lavished enormous funds on these structures Often they were among the most expensive artistic undertakings of a given prince They were part of an upsurge of theatrical invention in the performing arts At the same time the productions that took place within the opera house could threaten the social order to the point where rulers would raze them Johnson reconstructs the history of the opera house by bringing together evidence from a variety of disciplines including music art theatre and politics Writing in an engaging manner he sets the history of the opera house within its broader early modern social context
