## **Structured Financing Techniques In Oil And Gas Project:**

*Structured Financing Techniques in Oil & Gas Project Finance* Christopher L. Culp, 2015 Structured financing techniques in oil and gas related project finance have grown more popular over the past several decades Securitization in particular has played an important role in project finance by increasing oil and gas sponsors access to affordable financing from the capital markets and helping banks refinance their project loan exposures We review the economic benefits of using structured finance techniques in oil gas project finance and we explain and provide examples of several of the most common types future flow securitizations prepaids and volumetric production payments and project finance collateralized debt obligations We conclude with a discussion of the impact of the credit crisis on these products and markets Energy and Environmental Project Finance Law and Taxation Andrea Kramer, Peter Fusaro, 2010-12-09 Energy and Environmental Project Finance Law and Taxation New Investment Techniques provides practitioners with a useful and comprehensive discussion of energy and environmental project finance as it is developing and where it is going in light of new legal and tax rules This is the first time that internationally recognized lawyers and economists share their knowledge expertise and insights in this important and growing industry Energy and Environmental Project Finance Law and Taxation examines cutting edge techniques and analyses the recent tax and legal developments coming out of Washington all of which are revolutionizing the investment in and financing of energy and environmental projects Written for practitioners and laymen alike Energy and Environmental Project Finance Law and Taxation arms the reader with crucial knowledge about structuring and financing conventional renewable green financing and alternative energy projects It addresses carbon financing green power and traditional and new technologies including nuclear power wind photovoltaic solar geothermal biomass and the new generation of nuclear power This book also addresses the risks involved in structuring and financing these new technologies ways to hedge these risks and how to monetize the tax credits available for renewable energy projects Political and Investment Risk in the International Oil and Gas Industry Steven A. Mucci, 2017-10-11 This book examines the financial legal and institutional strategies available to the international oil and gas industry to manage political and investment risk The financial techniques for mitigating and allocating risk include corporate finance joint ventures and project finance The legal techniques include production sharing agreements profit sharing agreements service contracts bilateral investment treaties and multilateral investment treaties The institutional techniques include domestic courts national constitutions international arbitral tribunals governmental and non governmental regulatory agencies alliances and energy diplomacy This book traces the historical development of these techniques and their application in practice The effectiveness with which companies manage political and investment risk is important for the financial sustainability of individual firms and the industry as whole The real and perceived level of risk affects the level of exploration expenditures and therefore the balance between supply and demand and the price of oil and natural gas The search for a secure supply of oil and gas affects the political military and

economic relations between countries. Consequently every developed and developing country has placed energy policy at or near the top of its national priorities.

**The Construction Industry in the Fourth Industrial Revolution** Clinton Aigbavboa, Wellington Thwala, 2019-08-09. This book gathers papers from the 11th Construction Industry Development Board (CIDB) Postgraduate Research Conference held on 28-30 July 2019 in Johannesburg, South Africa. The conference provided an essential forum for reviewing and generating knowledge on Construction 4.0 and consequently highlighted processes and practices that allow us to deliver and operate built environment assets more effectively and efficiently by focusing on physical to digital and digital to physical transformation. The event addressed three broad themes: Industrial production, prefabrication, 3D printing and assembly offsite and advanced manufacturing; Cyber-physical systems, actuators, sensors, IoT, robots and cobots for repetitive and dangerous tasks, and drones for mapping, progress monitoring, safety and quality inspections, lifting, moving and positioning; and Technologies, digital ecosystems, digital platforms, BIM, video and laser scanning, AI and cloud computing, big data and data analytics, reality capture, blockchain, simulation, virtual and augmented reality, data standards and interoperability, and vertical and horizontal integration. Given its scope, the book will be of interest to all construction industry and architectural professionals who want to learn about cutting edge technologies applied to construction.

**Project Finance in Africa** Joshua Yindenaba Abor, Elikplimi Kolma Agbloyor, Paul Gbahabo, Saint Kuttu, Ashenafi Fanta, Baah Aye Kusi, 2025-02-14. Infrastructure drives economic growth and sustainable development by facilitating productivity, attracting foreign investment, promoting industrialisation, reducing poverty, improving standards of living and enhancing human development. Thus, the development of project-oriented frameworks, institutions that offer long-term infrastructure financing has been identified as a core and guaranteed way to maximise economic growth and development, especially for developing regions like Africa. Project finance has a critical role in infrastructure development. This book examines the project finance ecosystem, methods, analysis and key related risks. Its unique contribution to the literature is its focus on Africa, where there is a huge infrastructure investment deficit and a lack of technical know-how to bridge this gap. Following a detailed introduction to project finance, the book investigates project viability, project characteristics, risk analysis and management, structure and legal issues in the context of project finance, as well as project finance markets, banks and syndicated lending, financing the deal and the role of project advisors. It also offers insight into financial modelling and project evaluation, credit risk in project finance from the lender's perspective and the role of project finance in the petroleum industry. The book provides two African-related case studies of project finance. The book incorporates theoretical perspectives, valuable policy insights and resources and offers strategies to improve and reform the structure and implementation of project finance in Africa. It provides scholarly and professionally engineered knowledge and while each chapter explains and discusses several related issues, the case studies offer a real-life learning and teaching experience for academics and students to enhance their understanding of the issues under discussion.
