Statistics Kenya Unsd:

Measuring Global Migration Frank Laczko, Elisa Mosler Vidal, Marzia Rango, 2023-12-22 This book focuses on how to improve the collection analysis and responsible use of data on global migration and international mobility While migration remains a topic of great policy interest for governments around the world there is a serious lack of reliable timely disaggregated and comparable data on it and often insufficient safeguards to protect migrants information Meanwhile vast amounts of data about the movement of people are being generated in real time due to new technologies but these have not yet been fully captured and utilized by migration policymakers who often do not have enough data to inform their policies and programmes The lack of migration data has been internationally recognized the Global Compact for Safe Orderly and Regular Migration urges all countries to improve data on migration to ensure that policies and programmes are evidence based but does not spell out how this could be done This book examines both the technical issues associated with improving data on migration and the wider political challenges of how countries manage the collection and use of migration data The first part of the book discusses how much we really know about international migration based on existing data and key concepts and approaches which are often used to measure migration The second part of the book examines what measures could be taken to improve migration data highlighting examples of good practice from around the world in recent years across a range of different policy areas such as health climate change and sustainable development more broadly Written by leading experts on international migration data this book is the perfect guide for students policymakers and practitioners looking to understand more about the existing evidence base on migration and what can be done to improve it

that might be falling behind to ensure progress toward achieving the Sustainable Development Goals (SDGs). The Asian Development Bank and the Statistics Division of the United Nations Department of Economic and Social Affairs developed this practical guidebook with tools to collect, compile, analyze, and disseminate disaggregated data. It also provides materials on issues and experiences of countries regarding data disaggregation for the SDGs. This guidebook is for statisticians and analysts from planning and sector ministries involved in the production, analysis, and communication of disaggregated data.

International Views on Disability Measures Barbara Altman, Sharon N. Barnartt, 2006-04-18. As a voluntary organization of National Statistical Office representatives, the Washington Group addresses problems in statistical methods associated with the measurement of disability. This volume features papers which reflect a sampling of the work done by the Washington Group to address disability, an important public health problem. [The Challenge of Slums](#) United Nations Human Settlements Programme, 2012-05-23. The Challenge of Slums presents the first global assessment of slums, emphasizing their problems and prospects. Using a newly formulated operational definition of slums, it presents estimates of the number of urban slum dwellers and examines the factors at all levels from local to global that underlie the formation of slums, as well as their social, spatial, and economic characteristics and dynamics. It goes on to evaluate the principal policy responses to the slum challenge of the last few decades. From this assessment, the immensity of the challenges that slums pose is clear: almost 1 billion people live in slums, the majority in the developing world, where over 40 per cent of the urban population are slum dwellers. The number is growing and will continue to increase unless there is serious and concerted action by municipal authorities, governments, civil society, and the international community. This report points the way forward and identifies the most promising approaches to achieving the United Nations Millennium Declaration targets for improving the lives of slum dwellers by scaling up participatory slum upgrading and poverty reduction programmes. The Global Report on Human Settlements is the most authoritative and up-to-date assessment of conditions and trends in the world's cities. Written in clear language and supported by informative graphics, case studies, and extensive statistical data, it will be an essential tool and reference for researchers, academics, planners, public authorities, and civil society organizations around the world.
