In 1832 17 year old Otto von Bismarck had just entered university and was already rejecting the republican indoctrination of his grade school years Unlike so many of his day who had championed representative government Bismarck longed for the glory of a nation he believed would only be found under a single strong leader Though his early university days showed him he would be isolated by this thinking he strongly believed not only in the ideal of a national German state but in its possibility In his memoirs Bismarck recalls that at this young age he retained his own private National sentiments and his belief that in the near future events would lead to German unity in fact he made a bet with his American friend Coffin that this aim would be attained in twenty years Though it would take longer than he had predicted Germany would eventually be united and he would be the person responsible for accomplishing it Bismarck would go on to accomplish his goal and strengthen Germany into a modern political state by embracing specific political principles despite their lack of popularity Bismarck biographer Jonathan Steinberg refers to these principles as the Prussian legacy including the army inherited from the genius King Frederick the Great the fusion of the Junker class with the army and the bureaucracy the pervasive idea of Deinst or service the rigid distinction between the nobility and the bourgeoisie and a military conception of honor As the most interesting character of the nineteenth century Bismarck would spend his life in service of the Hohenzollern Kings elevating William I from a Prussian King near abdication King to the first German emperor He would alienate many along the way but under William he would retain what he wanted most the power to shape Germany's future Otto von Bismarck The Life and Legacy of the German Empire's First Chancellor looks at the life and work of Germany's most famous politician
