Luna-Reyes,Dolores E. Luna-Reyes,J. Ramon Gil-Garcia,Gabriel Puron-Cid,Sergio Picazo-Vela,2017-08-01 This book provides key strategic principles and best practices to guide the design and implementation of digital government strategies It provides a series of recommendations and findings to think about IT applications in government as a platform for information services and collaboration and strategies to avoid identified pitfalls Digital government research suggests that information technologies have the potential to generate immense public value and transform the relationships between governments citizens businesses and other stakeholders However developing innovative and high impact solutions for citizens hinges on the development of strategic institutional organizational and technical capabilities Thus far particular characteristics and problems of the public sector organization promote the development of poorly integrated and difficult to maintain applications For example governments maintain separate applications for open data transparency and public services leading to duplication of efforts and a waste of resources The costs associated with maintaining such sets of poorly integrated systems may limit the use of resources to future projects and innovation This book

provides best practices and recommendations based on extensive research in both Mexico and the United States on how governments can develop a digital government strategy for creating public value how to finance digital innovation in the public sector how to building successful collaboration networks and foster citizen engagement and how to correctly implement open government projects and open data It will be of interest to researchers practitioners students and public sector IT professionals that work in the design and implementation of technology based projects and programs **Global Encyclopedia of Public Administration, Public Policy, and Governance** Ali Farazmand,2023-04-05 This global encyclopedic work serves as a comprehensive collection of global scholarship regarding the vast fields of public administration public policy governance and management Written and edited by leading international scholars and practitioners this exhaustive resource covers all areas of the above fields and their numerous subfields of study In keeping with the multidisciplinary spirit of these fields and subfields the entries make use of various theoretical empirical analytical practical and methodological bases of knowledge Expanded and updated the second edition includes over a thousand of new entries representing the most current research in public administration public policy governance nonprofit and nongovernmental organizations and management covering such important sub areas as 1 organization theory behavior change and development 2 administrative theory and practice 3 Bureaucracy 4 public budgeting and financial management 5 public economy and public management 6 public personnel administration and labor management relations 7 crisis and emergency management 8 institutional theory and public administration 9 law and regulations 10 ethics and accountability 11 public governance and private governance 12 Nonprofit management and nongovernmental organizations 13 Social health and environmental policy areas 14 pandemic and crisis management 15 administrative and governance reforms 16 comparative public administration and governance 17 globalization and international issues 18 performance management 19 geographical areas of the world with country focused entries like Japan China Latin America Europe Asia Africa the Middle East Russia and Eastern Europe North America and 20 a lot more Relevant to professionals experts scholars general readers researchers policy makers and manger and students worldwide this work will serve as the most viable global reference source for those looking for an introduction and advance knowledge to the field **OECD Digital Government Studies Digital Government Review of Slovenia Leading the Digital Transformation of the Public Sector** OECD,2021-09-25 This Digital Government Review of Slovenia explores how the Government of Slovenia could enhance and harness digital government to achieve broader strategic goals It evaluates the efforts made so far by the Slovenian government in shifting towards a digital government approach by looking at institutional governance institutional digital talent public service delivery and the strategic use of data **Space Infrastructures: From Risk to Resilience Governance** Unal Tatar,Jean Muylaert,2020-04-15 Space critical infrastructures represent an interdependent system of systems consisting of workforce environment facilities and multidirectional interactions These are essential for the maintenance of vital societal functions
