Foundations of Airline Finance Bijan Vasigh, 2014-11-13. This new edition also includes capital budgeting, management of current assets, financial risk analysis, fuel hedging, and aircraft leasing. This textbook contains chapters that cover unique aspects of the aviation financial decision-making process. These include a rigorous and structured presentation of the buy versus lease decision that is prevalent in the industry, a valuation process for aviation assets, the recent trend toward privatization, and the difficulty inherent in the valuation of a publicly owned or semi-publicly owned asset. The Foundations of Airline Finance now in its second edition is an introductory text that can be used either as a general financial text or in a specialized class that deals with aviation finance in particular.
