Algebra Michael Artin Solutions:

Admissible Solutions of Hyperbolic Conservation Laws Tai-Ping Liu, 1981 We consider a system of n conservation laws partial derivative boundary degree of a polynomial symbol u over partial derivative boundary degree of a polynomial symbol t partial derivative boundary degree of a polynomial symbol f u over partial derivative boundary degree of a polynomial symbol x_0 The system is assumed to be strictly hyperbolic but not necessarily genuinely nonlinear in the sense of Peter Lax Hyperbolic systems of conservation laws 1957 Our purpose is to study the regularity large time behavior and the approximation of the solution of the initial value problem Our analysis is based on the random choice method using the solution of the Riemann problem as building blocks

Algebraic Geometry and Commutative Algebra Hiroaki Hijikata, Heisuke Hironaka, Masaki Maruyama, 2014-05-10 Algebraic Geometry and Commutative Algebra in Honor of Masayoshi Nagata presents a collection of papers on algebraic geometry and commutative algebra in honor of Masayoshi Nagata for his significant contributions to commutative algebra Topics covered range from power series rings and rings of invariants of finite linear groups to the convolution algebra of distributions on totally disconnected locally compact groups The discussion begins with a description of several formulas for enumerating certain types of objects which may be tabular arrangements of integers called Young tableaux or some types of monomials The next chapter explains how to establish these enumerative formulas with emphasis on the role played by transformations of determinantal polynomials and recurrence relations satisfied by them The book then turns to several applications of the enumerative formulas and universal identity including including enumerative proofs of the straightening law of Doubilet Rota Stein and computations of Hilbert functions of polynomial ideals of certain determinantal loci Invariant differentials and quaternion extensions are also examined along with the moduli of Todorov surfaces and the classification problem of embedded lines in characteristic p This monograph will be a useful resource for practitioners and researchers in algebra and geometry

Recent Advances in Noncommutative Algebra and Geometry K. A. Brown, T. J. Hodges, M. Vancliff, J. J.
