freely and securely on Alibaba's platforms. The company's vision is to achieve 1 trillion in gross merchandise by 2020 and to serve two billion customers by 2036. To achieve this, global operations are key, and experts propose globalization is better done now than later. Alibaba is currently experiencing high competitive pressure in China and will need to conquer new territories to continue on its current trajectory. Needless to say, entry into the US market will not only be difficult but also require premium strategic decisions with little to no room for errors.

Emergence of the Alibaba Business Ecosystem Giana Töngi, 2020 The concept of the Business Ecosystem, which is based on the existence of an orchestrator and the cooperation of various partnerships across industries, has proven itself not only as a young theoretical discipline but also in practice. Companies such as the Chinese Alibaba Group, which was founded in 1999 by Jack Ma, have recognized that through cooperation a greater value proposition can be offered to the customer. For this reason, Alibaba has improved its original core business of e-commerce and expanded into other industries such as financial services, logistics, and health care. By understanding the customer's movements within different business fields, Alibaba can collect, process, and analyze significant amounts of data relating to their everyday behavior. This allows for the company to offer individualized products and services. This work investigates as a case study how Alibaba has developed since its foundation, how its highly complex Business Ecosystem has evolved, and how Alibaba might develop in the future. The main focus is on the analysis of the interactions between the Alibaba-owned companies and its external partners. As a result, the Alibaba case analysis shows that many separate co-existing Business Ecosystems are embedded within the whole Alibaba Business Ecosystem. A total of five such separate Business Ecosystems are presented in this master thesis, and their relative functions are explained. These are Alibaba's FinTech, logistics, e-commerce, new retail, and consumer-centric ecosystems. As a result of this analysis, it was shown that Alibaba has partnerships that are very important for the existence of the ecosystem, but also on the other hand that some of their exits are negligible. Furthermore, even though the Alibaba Business Ecosystem is open to everyone, there still exist some exclusions and restrictions once someone is locked in to this Business Ecosystem.
