Beyond Medicine Paul V. Dutton,2021-04-15 In *Beyond Medicine* Paul V Dutton provides a penetrating historical analysis of why countless studies show that Americans are far less healthy than their European counterparts Dutton argues that Europeans are healthier than Americans because beginning in the late nineteenth century European nations began construction of health systems that focused not only on medical care but the broad social determinants of health where and how we live work play and age European leaders also created social safety nets that became integral to national economic policy In contrast US leaders often viewed investments to improve the social determinants of health and safety net programs as a competing priority to economic growth *Beyond Medicine* compares the US to three European social democracies France Germany and Sweden in order to explain how in differing ways each protects the health of infants and children working age adults and the elderly Unlike most comparative health system analyses Dutton draws on history to find answers to our most nettlesome health policy questions **Rural Education in America** Geoff Marietta,Sky Marietta,2021-03-01 *Rural Education in America* provides a comprehensive framework for understanding the diversity and complexity of rural communities in the United States and for helping rural educators implement and evaluate successful place based programs

tailored for students and their families Written by educators who grew up in rural America and returned there to raise their children the book illustrates how efficacy is determined by the degrees to which instruction interventions and programs address the needs and strengths of each unique rural community Geoff and Sky Marietta weave research compelling case studies and personal experience to illustrate effective approaches along the P 16 pipeline Emphasizing the value and vitality of these communities the authors advocate for solutions that fit the sociocultural and historical reality of the community rather than strategies that fundamentally support out migration They also provide tools that can be used to evaluate rural educational initiatives and implement place based strategies that are aligned with the strengths of a particular community Rural Education in America includes examples from a range of geographic locations including Eastern Washington Montana Ohio northern Minnesota North Carolina Mississippi Kentucky and the Navajo Nation Core chapters focus on critical issues for advancing rural education including early literacy STEM education and college completion while highlighting successful programs and partnerships in these areas This book presents a vision of what rural education can be and how it can attend to the well being of the people places and regions that it serves **League of American Nations** Carnegie Endowment for International Peace.
