respect to the nine criteria used for evaluating NOS Some of the textbooks however inevitably refer to HPS and thus provide guidelines for future textbooks A few of the textbooks go into considerable detail to present the atomic models of Dalton Thomson Rutherford Bohr and wave mechanical to illustrate the tentative nature of scientific theories an important NOS aspect These results lead to the question Are we teaching science as practiced by scientists An answer to this question can help us to understand the importance of NOS by providing students an HPS based environment so that they too just like the scientists feel the thrill and excitement of discovering new things This monograph provides students and teachers guidelines for introducing various aspects of NOS based on historical episodes
