

# THEORIES OF REVOLUTION: THE GENERATIONAL DEADLOCK

RADU-ALEXANDRU CUCUTĂ\*

## Abstract

*The paper attempts to highlight the main characteristics and the main flaws of the most important classification of theories of revolution, the generational approach. The first half aims to discuss and present the main tenets of the most important taxonomy of theories of revolution, as well as the similar attempts made by several scholars to build alternative classifications of theories of revolution. The second part of the paper attempts to show the limits of the aforementioned perspective and the importance of looking for alternative approaches to the study of revolutions. The paper considers that the generational perspective remains impermissibly flexible and elusive, ignoring the main paradigmatic debates within the field of study and maintaining a strong bias in favor of the clearest category, that of structural theories.*

*Key words:* revolution, theories of revolution, structural theories of revolution, generational classification.

## Introduction

The most important element that requires discussion is the relevance of classifications in the study of revolutions. I believe classifications are important for several reasons. On the one hand, they are important in mapping out the theoretical space pertaining to revolutions. On the other hand, the limits of classifications can become very well limits of theories of revolution. Moreover, classifications are relevant not only for the specific conceptual content of the theories themselves, but also in regard to the major paradigms of social science that influence the particular field, as well as for the very important relationship between the studied phenomenon and the theoretical framework encompassing it. Last, but not least, classifications are important in order to define the major theoretical debates that shape the study of revolutions.

The generational classification can be considered probably the most important effort dedicated to charting out the theoretical endeavors regarding revolutions<sup>1</sup>. The generational perspective, developed by Jack Goldstone and reaffirmed successively by John Foran divides the space of theories of revolutions into three clear generations of theories and a post-third generational perspective. The most important aspect of the generational perspective is that the classification is not purely chronological. Of course, the concept of a generation of theories is supposed not only to illustrate the apparition of successive perspectives on the revolutionary phenomenon, but also the important paradigmatic debates which are supposed to have taken place and to have influenced the study of revolutions. Moreover, the time-frame that encapsulates theories of revolution makes it easier to accommodate the influence that new events have on theoretical models and endeavors, thus showing for example how Third-World dynamics shaped and influenced theories of revolution which up to that point had been dedicated mostly to successful major social revolutions.

*Handbook of Revolutions in the 21st Century* Jack A. Goldstone, Leonid Grinin, Andrey Korotayev, 2022-05-19 The 21st century has witnessed a considerable and increasing number of political revolutions around the world This contradicts the popular belief of many experts in the 1970s that revolutions occurred mainly in monarchies and empires Instead the revolutions of this century have several new characteristics which call for a renewed analysis of the subject This handbook offers a comparative perspective on the new wave of revolutions of the last decade Presenting case studies on the color revolutions the Arab revolutions of 2010 2011 and the global wave of revolutions in 2013 2018 that spanned regions ranging from Africa to the Caucasus it offers a better understanding of the varied forms features and historical backgrounds of revolutions as well as their causes Accordingly it highlights recent revolutions in their historical and world systems contexts The handbook is divided into seven parts the first of which examines the history of views on revolution and important aspects of the theory of revolution The second part analyzes revolutions within long term historical trends and in their world system contexts In turn the third part explores specific major revolutionary waves in history The fourth part analyzes the first revolutionary wave of the 21st century 2000 2009 the so called color revolutions while the fifth discusses the second wave the Arab Spring 2010 2013 as an important turning point The sixth part is dedicated to analyzing revolutions and revolutionary movements beyond the Arab Spring and some revolutionary events from the third wave that began in 2018 The seventh and final part offers forecasts on the future of revolutions Given its scope the book will appeal to scholars and students from various disciplines interested in historical trends sociopolitical change contentious politics social movements and revolutionary processes involving both nonviolent campaigns and political violence Once again this volume demonstrates the kind of open minded systematic analysis that the field of revolutionary studies requires Prof George Lawson Department of International Relations Australian National University Canberra

*The Death Drive* Niklas Hageback, 2020-11-01 Sigmund Freud's death drive remains among the most controversial concepts in psychoanalysis something which post Freudians never could reach consensus on Over time it fell into oblivion Recent developments however have actualized the interest in the death drive as political upheavals and turmoil lead to societal breakdowns that according to reigning academic theory should not exist It has become a burning and contentious topic Existing conflict theories generally unmask structural factors considered as explanatory root causes whether social economic or political in nature but typically these factors may have been in place for decades These models consistently fail to identify the triggers that ignite abrupt change and what heralds it Anecdotally a certain self destructive sentiment seems to suddenly hold sway where the established order the status quo simply must be destroyed and the psychological urges to do so are too great to resist But why would individuals or collectives elect a self destructive path which on a superficial level seems to conflict with the survival instinct and the assumption of perpetual human progress Thus the question must be posed are these manifestations of the death drive The

Death Drive Why Societies Self Destruct offers an explanatory framework and methodology to predict periods of destruction that often have grim effects on societies taking as its starting point the controversial death drive concept The book provides a model to understand and forecast the seemingly irrational destructive human forces that hold such great and sinister influence on world affairs

Protests and Generations: Legacies and Emergences in the Middle East, North Africa and the Mediterranean ,2017-04-18 The aim of Protests and Generations is to problematize the relations between generations and protests in the Middle East North Africa and the Mediterranean Most of the work on recent protests insists on the newness of their manifestation but leave unexplored the various links that exist between them and what preceded them Mark Muhannad Ayyash and Ratiba Hadj Moussa Eds argue that their articulation relies at once on historical ties and their rejection It is precisely this tension that the chapters of the book address in specifically documenting several case studies that highlight the generating processes by which generations and protests are connected What the production and use of generation brings to scholarly understanding of the protests and the ability to articulate them is one of the major questions this collection addresses Contributors are Mark Muhannad Ayyash Lorenzo Cini ric Gobe Ratiba Hadj Moussa Andrea Hajek Chaymaa Hassabo Gal Levy Ilana Kaufman Sunaina Maira Mohammad Massala Matthieu Rey G kb r Sarp Tanyildiz and Stephen Luis Vilaseca Protests and Generations is now available in paperback for individual customers

Fifth Generation Warfare Armin Krishnan,2024-03-11 This book outlines the concept of Fifth Generation Warfare 5GW and demonstrates its relevance for understanding contemporary conflicts Non kinetic modes of attack and war waged by groups or non state actors at the societal level has been termed 5GW This book discusses the theory of generational warfare and explores the key ideas of 5GW such as secrecy the manipulation of proxies the manipulation of identity and culture including disinformation and big data and the use of psychological warfare These techniques are used to achieve strategic objectives such as inducing desired behaviour and controlling human terrain without resorting to overt war or overt violence The text expands the debate on 5GW by exploring emerging technologies and how they could be used for maliciously shaping human society and even for maliciously changing the genetic makeup of a population for the purpose of unprecedented social control The work closes with comments on the possibility of a Sixth Generation of Warfare which targets technical systems to possibly collapse a society through strategic sabotage Overall the book demonstrates the relevance of 5GW for understanding contemporary conflicts from the Arab Spring to the war in Ukraine in terms of the need for dominating the human domain This book will be of interest to students of security and technology defence studies and International Relations

Charles Francis Horne, 1926      **Georg Lukács and His Generation, 1900-1918** Mary Gluck, 1985 Mary Gluck introduces us to a Lukács we have never met Here is Lukács among his friends lovers and peers in those important years before 1918 when he converted to Communism and Marxism at the age of thirty nine Georg Lukács claimed in later life that his early achievements lacked genuine coherence being expressions of a vague romantic anticapitalism that only found resolution in his conversion to Marxism By integrating Lukács with his early generational grouping and making expert use of a new treasure trove of documents from his early years Gluck demonstrates that revolutionary socialism was not the inevitable outcome of Lukács early cultural radicalism but only one of several possible options in the fragmented ideological climate of postwar Europe From this new perspective his pre Marxist career takes on a cultural consistency that parallels and illuminates the inner strivings of the early modernists before the outbreak of World War I Lukács emerges in this generational portrait not only as dramatic and psychologically complex but also as a representative figure whose inner dilemmas were echoed in the lives of many other radical intellectuals who came of age during the fin de siècle period Gluck situates Lukács within a fascinating network of friends and associates the so called Sunday Circle which included such people as Karl Mannheim Arnold Hauser Bela Balázs and Anna Lesznai She adeptly anchors this group within the context of social and economic transformations in Hungary that brought new conservative antisemitic movements to the fore and that marginalized the assimilated Jewish middle classes to which Lukács and most of his friends belonged Retracing their collective hopes and values helps to clarify the far ranging cultural crisis associated with the decline of nineteenth century liberal culture and the emergence of the modernist sensibility      **1789, Reading, Writing Revolution** Francis Barker, 1982
