A 30-minute Summary Inside this Instaread Summary Overview of the entire book Introduction to the important people in the book Summary and analysis of all the chapters in the book Key Takeaways of the book A Reader's Perspective Preview of this summary In *The Power of Habit*, Charles Duhigg explains how all of our lives are a mass of habits. Many of our choices are not based on careful decision making; they are instead habits, and these habits have a tremendous influence on our health and productivity. Once we understand how habits are formed and how they work, we can learn how to change them. This book is divided into three parts. The first part focuses on the habits of individuals. In this section, Duhigg explains the habit loop and how habits work. A habit loop is made up of a cue or trigger, a routine, and a reward. Duhigg's examples show us how, once habits are lodged in our brain, they influence how we act, often without our realizing it. Advertisers take advantage of our habits to convince us to buy their products. Advertisers know that cravings are what drive the habit loop from the cue to the routine to the reward and back again. They are also aware that knowing how to spark a craving is the key to creating a new habit.

Preview *The Power of Habit* by Charles Duhigg is a thorough examination of several case studies about how habit formation and habit change impact daily life. It details the experiences of individuals, corporations, and organizations to illustrate how habits are made and why, how they can be changed, how habits of all kinds are used in businesses to attract customers or manage employees, and the devastating results of a poorly managed habit. Several studies of individuals with unusual habits or habit changes explain the neurological mechanisms that form habits in the brain. The habit stored in the basal ganglia for neural efficiency is the result of a loop comprised of three parts. These parts are a cue that triggers the habit loop, a routine to execute and feedback or a reward that tells the brain to remember the habit for the future. Habits can be changed by retaining the cue and reward.
