William Crain, 2015-10-02 The result of extensive scholarship and consultation with leading scholars this text introduces students to twenty four theorists and compares and contrasts their theories on how we develop as individuals Emphasizing the theories that build upon the developmental tradition established by Rousseau this text also covers theories in the environmental learning tradition *Concepts and Theories of Human Development* Richard M. Lerner, 2013-05-13 A classic in the field this third edition will continue to be the book of choice for advanced undergraduate and graduate level courses in theories of human development in departments of psychology and human development This volume has been substantially revised with an eye toward supporting applied developmental science and the developmental systems perspectives Since the publication of the second edition developmental systems theories have taken center stage in contemporary developmental science and have provided compelling alternatives to reductionist theoretical accounts having either a nature or nurture emphasis As a consequence a developmental systems orientation frames the presentation in this edition This new edition has been expanded substantially in comparison to the second edition Special features include A separate chapter focuses on the historical roots of concepts and theories of human development on philosophical models of development and on developmental contextualism Two new chapters surrounding the discussion of developmental contextualism one on developmental systems theories wherein several exemplars of such models are discussed and a corresponding chapter wherein key instances of such theories life span life course bioecological and action theoretical ones are presented A new chapter on cognition and development is included contrasting systems approaches to cognitive development with neo nativist perspectives A more differentiated treatment of nature oriented theories of development is provided There are separate chapters on behavior genetics the controversy surrounding the study of the heritability of intelligence work on the instinctual theory of Konrad Lorenz and a new chapter on sociobiology A new chapter concentrates on applied developmental science

Theories of Human Development Barbara M. Newman, Philip R. Newman, 2010-10-18 Intended for courses on theories of human development this new text presents nine theories grouped into three major families those that emphasize biological systems those that emphasize environmental factors and those that emphasize a dynamic interaction between biological and environmental forces The nine theories selected have a long and productive history in human development and continue to evolve as a result of new insights The inclusion of social role theory and life course theory expand the book s relevance to the

study of adulthood and aging Grouping the theories by families enhances students ability to think critically about theoretical ideas assess the strengths and weaknesses of each theory and gain a deeper understanding of how each theory guides research and application The three families are introduced with a brief overview of the unique perspectives of each theory and the rationale for grouping these theories together Discussion of each theory includes the historical and cultural context in which the theory was developed an overview of key concepts and important ideas new directions in contemporary scientific work a research example illustrating how the theory has been tested and modified an application showing how the theory has guided the design of an intervention or program an analysis of how the theory answers basic questions about human development and a critique highlighting the theories strengths and weaknesses Theories of Human Development serves as a text in advanced undergraduate and or beginning graduate courses in theories of human development Its clear organization and engaging writing style make it accessible to students with a minimal background in human development

Six Theories of Child Development ,1989 Theories of Developmental Psychology Patricia H. Miller,2018-02-08 Always reflective of the latest research and thinking in the field Patricia Miller s acclaimed text offers an ideal way to help students understand and distinguish the major theoretical schools of child development This fully updated new edition includes a new focus on biological theories of development **Recent Theories of Human Development** R. Murray Thomas,2000-10-17

Intended as supplemental reading in courses on theories of development this book augments traditional core texts by providing students with more depth on about two dozen recent and emerging theories that have appeared over the course of the past 20 years This period has seen a decline of the traditional grand theories that attempt to apply to all people all the time in favor of micro theories that focus more on individual differences so a book like this actually points the way toward the future rather than dryly reviewing the past In addition the author inspects the changing ways in which the concept of theory itself has been interpreted during this period and he concludes with a chapter suggesting future directions An

Introduction to Theories of Human Development Neil J Salkind,2004-01-22 The book is well written and the theorists and their respective work are well presented and clearly explained As a text dealing with the historical overview of major theorists and their work in human development over the last century or so it is extremely strong and could be widely used in a variety of both undergraduate and graduate courses Ann C Diver Stamnes Humboldt State University In general I found the websites and references listed at the end of each chapter to be very interesting and useful for taking students beyond what is in the text Jane Ledingham University of Ottawa A fine choice for a classic theories course and I believe that the level of presentation would be appropriate for advanced undergraduate or graduate students The up to date web sites at the end of each section are a definite plus The choice of sites is excellent Cosby Steele Rogers Virginia Tech An Introduction to Theories of Human Development examines the development process looking at the series of changes that occur as a result of an interaction between biological and environmental factors Why might our behavior as an adult be so different from when we

were infants Why and how does one stage of development follow the next Are the changes that we experience abrupt in nature or smooth and predictable Author Neil J Salkind reflects on such critical questions to help readers understand what happens along the way as one develops from infancy through later life This book provides a comprehensive view of the primary theoretical models of human development including those from the biological psychoanalytic behavioral and cognitive developmental perspectives Along with a brief discussion of a historical background for each of these approaches An Introduction to Theories of Human Development examines the application of these theories to various aspects of human development such as the effectiveness of early intervention individual differences adolescence and sociobiology Features of this text A final integrative chapter compares the various theories presented in the book using Murry Sidman s model of six criteria for judging a theory to help develop students skills for critically assessing theory Classic approaches to understanding human behavior across the lifespan are also examined Pedagogical features such as chapter opening quotes boxed highlights key terms a glossary and websites for further reading enhance student understanding of everyday human behavior An Introduction to Theories of Human Development is an accessible text for advanced undergraduate students in the social and behavioral sciences including such fields as psychology education human services nursing sociology social welfare and human development and family studies

Theories of Child Development Alfred L. Baldwin, 1966 **Theories of Human Development** Neil J. Salkind, 1981 **Theories of Development** Jonas Langer, 1969 Theories of Developmental Psychology P.H. Miller, 1993 *Theories of Human Development* Michael G. Green, John A. Piel, 2015-07-14 The authors have grouped the theories into three classical families which differ in their views relative to the prime motives

underlying human nature They show how theories are specific examples of more general points of view called paradigms The theories chosen to represent the three paradigms the Endogenous Paradigm Exogenous Paradigm and the Constructivist Paradigm were selected because they met four criteria importance as judged by academic and research psychologists fertility as judged by the amount of research the theory has generated scope as judged by the variety of phenomena the various theories explain family resemblance as judged by how well each theory represents its paradigm The authors present the paradigm case in the lead chapter for each paradigm This paradigm case is the best example for the paradigm The authors explain why paradigm cases are important and give them more detailed treatment than other theories in the same paradigm
