[Design Thinking with Artificial Intelligence](#) Daniel

Graff, Mark A. Clark, Dan Li, Lei Xia, 2026-03-11 This book is a timely and valuable guide for innovators, designers, managers, and students who want to boost their design thinking projects through leveraging artificial intelligence capabilities. It offers over 40 traditional design thinking tools enhanced with AI. Each AI tool is ready for use with specific step-by-step instructions that require little previous AI knowledge. So if you would like to use AI to create a Critical Items Diagram, deploy Explorative AI to AI Interviews, build a Customer Journey Map, engage in Rapid Prototyping, or Create a Pitch, there is a tool to support your project. The book highlights how AI can support and enhance each phase of the design thinking process: prepare it, augment it, and draw on real-world experiments they reveal how the future of creative work lies in a dynamic dialogue between human intuition and computational power. This book is a manifesto for the next great leap in innovation: a practical framework for unlocking human-AI collaboration and building a future where imagination and computation work hand in hand.

Anna Phan, UX Lead, Monetization, Google. Most people think of design as a way to make things look better. This book asks a deeper question: what happens when design itself starts to think? In *Design Thinking with Artificial Intelligence*, Graff and his team show how AI doesn't replace creativity; it reorganizes it. Their experiments with students, businesses, and algorithms reveal something quietly revolutionary: the future of innovation isn't man or machine, but the conversation between them. It's a manual for the next creative leap when intuition meets computation and imagination learns to collaborate.

Ling Fan, Founder, Tezign; Founder, d mix Lab. This comprehensive, thoughtful book masterfully lays out the foundations of Design Thinking and the immense potential of integrating AI to accelerate and improve any design process. Packed with practical, how-to examples, the authors demonstrate how to seamlessly weave AI into your existing workflow, equipping you with powerful new tools and techniques for every step of the design process. Most importantly, the book proves how AI can augment, not replace, human innovation and creativity, providing the knowledge to effectively upskill talented designers. By putting design and human creativity firmly at its core, this is a foundational, essential resource for anyone looking to enhance their creative edge in the age of AI.

John O'Hara, Design and Technology Leader. *Design Thinking with Artificial Intelligence* is an essential guide for navigating the future of innovation. This book provides a relevant framework for professionals and students to deploy effective human-AI collaborations to solve complex problems and drive meaningful innovation.

Prof. Yongqi Lou, Honorary Doctor, Royal College of Art; President, Shanghai University of Engineering Science; Chaired Professor, Tongji University. This book arrives at a critical moment for leaders navigating the intersection of AI and human creativity. True AI transformation in enterprises is not merely a technology challenge; it's a human capital challenge. Success depends on how effectively organizations can reimagine workflows, empower teams, and reskill their workforce to collaborate with intelligent systems. By linking design thinking with AI, this book offers a practical roadmap for making that collaboration real. It's an essential guide for executives, innovators, and educators who believe the future of enterprise innovation lies in an AI-human workforce.
