

### **Magic Bullet Theory /Hypodermic Needle Theory**

The "magic bullet" and "hypodermic needle" models originate from Harold Lasswell's 1927 book, Propaganda Technique in the World War. It states that media message is very powerful and injects into the mind of audience in such a way as a bullet acts rapidly on the body.

### **Two step Flow Theory**

In the 1940s, Lazarsfeld disproved the "magic bullet" theory and "hypodermic needle model theory" through elections studies in "The People's Choice".[10] Lazarsfeld and colleagues executed the study by gathering research during the election of Franklin D. Roosevelt in 1940. The study was conducted to determine voting patterns and the relationship between the media and political power. Lazarsfeld discovered that the majority of the public remained unfazed by propaganda surrounding Roosevelt's campaign. Instead, interpersonal outlets proved more influential than the media. Therefore, Lazarsfeld concluded that the effects of the campaign were not all powerful to the point where they completely persuaded "helpless audiences", a claim that the Magic Bullet, Hypodermic Needle Model, and Lasswell asserted. These new findings also suggested that the public can select which messages affect and don't affect them.
