North American Fuzzy Information Processing Society. Annual Meeting,2003 *Books in Print Supplement*,2002 *Rethinking Prototyping* Christoph Gengnagel,Axel Kilian,Julien Nembrini,Fabian Scheurer,2013-10-02 Design modelling has benefited from computation but in most projects to date there is still a strong division between computational design and simulation leading up to construction and the completed building that is cut off from the computational design modelling The Design Modelling Symposium Berlin 2013 would like to challenge the participants to reflect on the possibility of computational systems that bridge design phase and occupancy of buildings This rethinking of the designed artifact beyond its physical has had profound effects on other industries already How does it affect architecture and engineering At the scale of engineering and building systems new perspectives may open up by engaging built form as a continuous prototype which can track and respond during use and serve as a real world implementation of its design model This has been tried many times from intelligent fa ades to smart homes and networked grids but much of it was only technology driven and not approached from a more holistic design perspective
