Hagin, Jack K. Cohen, 1996-01-01 *Calculus the Maple Way* Robert B. Israel, 2000 Maple via Calculus Robert J. Lopez, 2012-01-30 Modern software tools like Maple have the potential to alter radically the way mathematics is taught learned and done Bringing such tools into the classroom during lectures assignments and examinations means that new ways of looking at mathematics can become permanent fixtures of the curriculum It is universal access that will make a software based approach to mathematics become the norm In 1988 with NSF funding under an III grant I had the opportunity to bring Maple into the calculus classroom at Rose Hulman Institute of Technology Since then a new curriculum based on the availability of computer algebra systems has evolved at RHIT and in my own courses This volume contains a record of some of the insights gained into pedagogy using Maple in calculus The activities and ideas captured in these Maple worksheets reflect concepts in calculus implemented in Maple There is an overt message to the reader that carries with it a side effect However it is possible that for one reader the side effect is the message and the message is the side effect I had intended to put before my audience examples extracted from my Maple based curriculum to entice a wider acceptance of the benefits of making a computer algebra system become the basis of a revised calculus syllabus By examples I had hoped to demonstrate the rightness of using software tools for teaching and learning calculus **Multivariable Mathematics with Maple** James A.
