

CHAPTER-1

INTRODUCTION TO ONLINE CAR RENTAL SYSTEM

1.1 Introduction

This project is designed so as to be used by Car Rental Company specializing in renting cars to customers. It is an online system through which customers can view available cars, register, view profile and book car.

1.2 Reason for the Project

The advancement in Information Technology and internet penetration has greatly enhanced various business processes and communication between companies (services provider) and their customers of which car rental industry is not left out. This E-Car Rental System is developed to provide the following services:

- **Enhance Business Processes:** To be able to use internet technology to project the rental company to the global world instead of limiting their services to their local domain alone, thus increase their return on investment (ROI).
- **Online Vehicle Reservation:** A tools through which customers can reserve available cars online prior to their expected pick-up date or time.
- **Customer's registration:** A registration portal to hold customer's details, monitor their transaction and used same to offer better and improve services to them.
- **Group bookings:** Allows the customer to book space for a group in the case of weddings or corporate meetings (Event management).
