21st Century Economics: A Reference Handbook Rhona C. Free, 2010-05-14 Interest in economics is at an all time high Among the challenges facing the nation is an economy with rapidly rising unemployment failures of major businesses and industries and continued dependence on oil with its wildly fluctuating price Americans are debating the proper role of the government in company bailouts the effectiveness of tax cuts versus increased government spending to stimulate the economy and potential effects of deflation Economists have dealt with such questions for generations but they have taken on new meaning and significance Tackling these questions and encompassing analysis of traditional economic theory and topics as well as those that economists have only more recently addressed *21st Century Economics A Reference Handbook* is intended to meet the needs of several types of readers Undergraduate students preparing for exams will find summaries of theory and models in key areas of micro and macroeconomics Readers interested in learning about economic analysis of an issue as well students embarking on research projects will find introductions to relevant theory and empirical evidence And economists seeking to learn about extensions of analysis into new areas or about new approaches will benefit from chapters that introduce cutting edge topics To make the book accessible to undergraduate students models have been presented only in graphical format minimal calculus and empirical evidence has been summarized in ways that do not require much background in statistics or econometrics It is thereby hoped that chapters will provide both crucial information and inspiration in a non threatening highly readable format

Confronting Exclusion African Minds, 2013 South Africa has made important political strides

over the past two decades It has created a framework of democratic legislative executive and judicial institutions that mark a clear break from the apartheid past In theory they are inclusive and offer every citizen equal access to constitutionally protected rights Their capacity to deliver however is coming under increasing pressure and as this happens citizen confidence in their efficacy is waning Much of the pressure which ultimately may affect their legitimacy in the eyes of ordinary citizens stems from the desperation and sense of economic exclusion experienced by those who find themselves at the wrong end of South Africa s grossly unequal society If this decline in trust persists the cohesive effects of the country s democratic institutions will diminish and instability will become an increasingly common feature of political contestation An immediate but only partial remedy to the current state of affairs would be to prioritise transparency accountability and leadership integrity within the system to restore trust in the bona fides of key institutions The longer term challenge will be to counter a growing sense of economic exclusion where violent police action rather than democratic process is increasingly employed to stave off the manifestations of material anxiety experienced by struggling citizens This edition of the Transformation Audit titled *Confronting Exclusion* focuses on instances of such exclusion but as in previous years also prioritises the search for inclusive economic policy and future strategies to address them By looking at each of the four chapter areas it seeks to find answers to the challenge of a society in which the promise of true freedom and equal rights will remain only that until people feel equipped to be in charge of their own destiny and that of their children

The Role of the State in Migration Control Aoife McMahon,2016-11-21 This research questions the seemingly ossified premise that states have an absolute discretion to control international migration Applying Max Weber s theories of legitimacy it determines that while states have certain traditionally legitimate functions migration control as distinct from the determination of citizenship is not one such function Measures of migration control must thus be justified on a rational legal basis that is on a minimal evidential basis Acknowledging the many obstacles states face in carrying out this legitimising exercise it is suggested that a supranational approach at the regional level is the most sustainable long term

model with an ultimate aim of achieving inter regional cooperation on migration management on the basis of equality between regions
